Search continues on Earth  
 Plants search for water  
 Butterflies search for flowers  
 Bees search for honey  
 Animals search for its prey  
 Search and Research goes on  
 Human searches for (MONEY) BUSINESS  
 Education and Medication have become business,  
 Which are the breaths of Life  
 Five sense species search for its need  
 They live peacefully but six sensed  
 Human searches for MONEY and  
 Lost many such as  
 Peace, Love, Togetherness,  
 Kith and kin  
 Forget the yesterday  
 Do not think about tomorrow  
 Live today with  
 Pure love, content and humanity  
 Bury all your worries  
 Possession of materials won't give you  
 Pleasure  
 Feel for the forlorn  
 Forgotten and forbidden souls  
 Do we need to search?  
 Of course, we need to search  
 In order to find what we have missed, or lost

It doesn't claim the story of schooling as a public decent, rather the strategy pushes for private practices contradictory to public objectives. The new National Education Policy, coming after a hole of almost 34 years, has been met, all things considered, with a ton of trust and assumption. It implies to give an extraordinary edge to the school system to make it more adaptable and open to all. It vows to adjust schooling to the yearnings of the adolescent, bringing to them the abilities required for the 21st century, while at the same time being established in Indian culture and ethos. It advocates utilizing innovation to carry information nearer to the understudies. It additionally claims to reinforce the government funded school system and to align private arrangement of instruction with similar principles as forced on people in general. The world is going through quick changes in the information scene. With different sensational logical and innovative advances, for example, the ascent of large information, AI, and man-made consciousness, numerous untalented positions worldwide might be taken over by machines, while the requirement for a talented labor force, especially including arithmetic, software engineering,

#### **ABSTRACT :**

The current paper takes a gander at the authentic foundation of the ascent of woman's rights and women's' development and doing orientation in India. In India as well as all around the world there has been a nearby connection among women's liberation and the women's' development, each moving and improving the other. In the Indian setting, while the women's' development is a significantly sooner peculiarity, the term Feminism is a cutting edge one. Women's liberation involves various social, social and political developments, speculations and moral ways of thinking worried about orientation disparities and equivalent privileges for women's. In the pre-autonomy time, the women's' development started as a social change development in the nineteenth hundred years. As of now, the western thought of freedom, uniformity and organization was being soaked up by our informed world class through the investigation of English and the contact with west. This western progressivism was reached out to the women's' inquiry and was converted into a social change development. In the post-Independence time frame during the initial not many years, the central issue was for by and large monetary development. This was quickly trailed by one more ten years, which saw an expanded worry for value and neediness.
