# I SEMESTER Core Course-I: Fundamentals of Geomorphology

SEMESTER-I				
COURSE CORE - CC -I				
	FUNDAMENTALS OF GEOMORPHOLOGY TEACHING HOURS: 60 (6hours, 5credits)			
UNIT	LEARNING OBJECT		5)	
CO1	To understand scope and content of Geomorpho		xplains the Rocks	
	and types of rocks.		1	
CO2	To Explains the continental drift theory, classify	Endogenic	and Exogenic	
	forces. Discuss the fold, fault and volcano types.			
CO3	To illustrate the factors affecting weathering and			
CO4	To compare and classify Glacier and its types an	d types of l	andforms	
CO5	To explain the work of wind waves	NO OF	COLIDGE	
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES	
I	Geomorphology – Meaning – Scope and Content (Structure of the earth) – Rocks-Rocks types (Igneous Rock, Metamorphic Rock, and Sedimentary Rock)	12	CO1	
II	Wegner's continental drift theory – Sea floor spreading – Plate tectonics- Earth movements (Endogenic and Exogenic) - Fold and its types – Fault and its types - Earthquake and its types - Types of Volcanoes.	12	CO2	
III	Weathering: Factors affecting Weathering- Types of Weathering Mass Wasting and its types- Agents of Gradation – Normal Cycle of Erosion – Davis cycle (structure, stage, process) Work of Rivers- Erosion – Transportation- Deposition –Erosional Landforms -Depositional Landforms.	12	CO3	
IV	Work of Glaciers – Types of Glaciers – Glacial Landforms – Erosional Landforms Underground Water – Water Table – Aquifer- Spring and its types – Karst Landforms – Erosional Landforms and Depositional Landforms	12	CO4	
V	Work of Wind- Erosional Landforms and Depositional Landforms. Work of waves- Erosional landforms- Depositional landforms of Sea waves and Types of coasts.	12	CO5	

VI	Assessment Unit		
UNIT	LEARNING OUTCOMES		
	<b>Recall</b> the meaning, Scope and Content of Geomorphology. Summarise the interior structure of the earth, differentiate the types of rocks their formation,		
I	and the Rock cycle, <b>understand</b> the formation of major landforms and Knows		
1	the distribution of Land and Sea, Are able to identify the formation and type of		
	rocks		
	Relates Wegner's continental drift theory, Sea floor spreading, Plate tectonics		
II	and Earth movements (endogenetic and exogenetic) to the formation of		
	mountain, plateau, plains and lakes with its types		
	<b>Differentiates</b> the weathering process and mass wasting and their types,		
III	understands Normal Cycle of Erosion of Davis (structure, stage, process).		
	identifies Work of Rivers.		
IV	Understands and appreciates the formation of various landforms by Glacier,		
	underground water, Aquifer and karst topography.		
V	<b>Understands</b> and <b>appreciates</b> the formation of various landforms formed by		
	wind and waves		
VI	Assessment Unit		
UNIT	LEARNING OUTCOMES		
I	Sial, Sima, Mantle, Outer Core, Inner Core		
II	Major Plates: African, Antarctic, Eurasian, North American & South American, Minor Plates		
	Normal Cycle Of Erosion, Initial Stage, Youthful Stage, Mature Stage, Old		
III	Stage		
IV	'U' Shaped Valleys, 'V' Shaped Valleys		
V	Sand dunes, Coastal Landforms

#### I – SMESTER Core Course-II P : Maps scale and Land Scape Aanalysis

Core Course :-II P
Maps Scaleand landscape Analysis
Teaching Hours: 60 (2 hours)

#### **Course Objectives:**

To Understand the Meaning and Construction Of Scales, Enlargement and Reduction Of Maps, Measurement of Distance and Area.

To Familiarize the Students with Aspects Map, Identify and Draw the Land Forms, Density Analyzed in Drainage Basin.

UNIT	DETAILS	NO.OF	COURSE
ONII	DETAILS	HOURS	<b>OBJECTIVES</b>
	SCALES: Meaning, Conversion of Scales –		
I	Construction of Simple Linear Scales,	12	CO1
	Comparative Scales, Diagonal Scales.		
	MAPS – Definition – Types and significance		
II	of map – Enlargement and Reduction of	12	CO2
11	Maps: Square and Similar Triangular	12	
	Methods.		
	MEASUREMENT OF DISTANCE: Thread,		
III	Divider and Rotometer methods –	12	CO3
111	Measurement of Area Square and Strip		
	methods – Function of Planimeter.		
	Representation of Relief: Contours –		
	Interpolation – Method of representation:		
	Pictorial: Hachures and Hill Shading –	12	CO4
IV	Mathematical Method: Spot Heights, Bench		
IV	Marks, Trigonometric Stations and Contours		
	– Drawing Contour Diagrams: Uniform		
	Slope, Concave Slope, Convex Slope,		
	Undulating Slope, Hill, Knoll, Ridge,		

Saddle, V - Shaped Valley, Gorge, U - Shaped Valley, Cliff, Over Hanging Cliff, Cirque, Hanging Valley, Escarpment, Spur, Waterfall, Meander, Incised Meander, Flood Plain, Plateau, Dissected Plateau, Volcanic Cone, Sand Dunes, Ria Coast and Fiord Coast.    Stream Analysis: Morpometric Analysis - Bifurcation ratio - Stream order, Length, Area Measurement and Density of Drainage Basin.    National Atlas And Thematic Mapping Organization (NATMO) - Landscape analysis by GIS and Survey of India (SOI), GNSS, NRSA and GNSS.    Expected Course Outcomes: 1   Learn the basic scales and mapping knowledge. 2   Understand the map enlargement and reduction and measurement. 3   Identified the Map Route Length and River Length. 4   Analyze the real - world physical features from the topographical sheets. 5   Identify Stream order and understand Density of Drainage Basin. 6   Understand the Landscape analysis				1
V Bifurcation ratio – Stream order, Length, Area Measurement and Density of Drainage Basin.  National Atlas And Thematic Mapping Organization (NATMO) – Landscape analysis by GIS and Survey of India (SOI), GNSS, NRSA and GNSS.  Expected Course Outcomes:  1 Learn the basic scales and mapping knowledge. 2 Understand the map enlargement and reduction and measurement. 3 Identified the Map Route Length and River Length. 4 Analyze the real – world physical features from the topographical sheets. 5 Identify Stream order and understand Density of Drainage Basin. 6 Understand the Landscape analysis  Specific Outcomes: 1 Plain Scales 2 Process of Compiling Maps 3 Instruments For Area Measurement 4 Representations of Heights and Various Relief Features 5 Tributaries, Streams Orders, Measurements 6 GIS, SOI, GNNS  Text Book(s): 1 Jayachandran, (1964): Practical Geography (Tamil Edition) Tamil Nadu Text Book Society, Chennai. 2 Zulfequar Ahmad Khan, M. D. (1998) Text book of Practical Geography, Concept Publishing Company, New Delhi.  Reference Book(s): 1. R. P. Misra and Ramesh Fundamentals of cartography.		Shaped Valley, Cliff, Over Hanging Cliff, Cirque, Hanging Valley, Escarpment, Spur, Waterfall, Meander, Incised Meander, Flood Plain, Plateau, Dissected Plateau, Volcanic Cone, Sand Dunes, Ria Coast and Fiord		
VI Organization (NATMO) – Landscape analysis by GIS and Survey of India (SOI), GNSS, NRSA and GNSS.  Expected Course Outcomes:  1 Learn the basic scales and mapping knowledge.  2 Understand the map enlargement and reduction and measurement.  3 Identified the Map Route Length and River Length.  4 Analyze the real – world physical features from the topographical sheets.  5 Identify Stream order and understand Density of Drainage Basin.  6 Understand the Landscape analysis  Specific Outcomes:  1 Plain Scales  2 Process of Compiling Maps  3 Instruments For Area Measurement  4 Representations of Heights and Various Relief Features  5 Tributaries, Streams Orders, Measurements  6 GIS, SOI, GNNS  Text Book(s):  1 Jayachandran, (1964): Practical Geography (Tamil Edition) Tamil Nadu Text Book Society, Chennai.  2 Zulfequar Ahmad Khan, M. D. (1998) Text book of Practical Geography, Concept Publishing Company, New Delhi.  Reference Book(s):  1. R. P. Misra and Ramesh Fundamentals of cartography.	V Bifurcation ratio – Stream order, Length, Area Measurement and Density of Drainage		12	CO5
1 Learn the basic scales and mapping knowledge. 2 Understand the map enlargement and reduction and measurement. 3 Identified the Map Route Length and River Length. 4 Analyze the real – world physical features from the topographical sheets. 5 Identify Stream order and understand Density of Drainage Basin. 6 Understand the Landscape analysis  Specific Outcomes: 1 Plain Scales 2 Process of Compiling Maps 3 Instruments For Area Measurement 4 Representations of Heights and Various Relief Features 5 Tributaries, Streams Orders, Measurements 6 GIS, SOI, GNNS  Text Book(s): 1 Jayachandran, (1964): Practical Geography (Tamil Edition) Tamil Nadu Text Book Society, Chennai. 2 Zulfequar Ahmad Khan, M. D. (1998) Text book of Practical Geography, Concept Publishing Company, New Delhi.  Reference Book(s): 1. R. P. Misra and Ramesh Fundamentals of cartography.	VI	Organization (NATMO) – Landscape analysis by GIS and Survey of India (SOI),		
2 Understand the map enlargement and reduction and measurement. 3 Identified the Map Route Length and River Length. 4 Analyze the real – world physical features from the topographical sheets. 5 Identify Stream order and understand Density of Drainage Basin. 6 Understand the Landscape analysis  Specific Outcomes: 1 Plain Scales 2 Process of Compiling Maps 3 Instruments For Area Measurement 4 Representations of Heights and Various Relief Features 5 Tributaries, Streams Orders, Measurements 6 GIS, SOI, GNNS  Text Book(s): 1 Jayachandran, (1964): Practical Geography (Tamil Edition) Tamil Nadu Text Book Society, Chennai. 2 Zulfequar Ahmad Khan, M. D. (1998) Text book of Practical Geography, Concept Publishing Company, New Delhi.  Reference Book(s): 1. R. P. Misra and Ramesh Fundamentals of cartography.	Expe	cted Course Outcomes:		
3 Identified the Map Route Length and River Length. 4 Analyze the real – world physical features from the topographical sheets. 5 Identify Stream order and understand Density of Drainage Basin. 6 Understand the Landscape analysis  Specific Outcomes: 1 Plain Scales 2 Process of Compiling Maps 3 Instruments For Area Measurement 4 Representations of Heights and Various Relief Features 5 Tributaries, Streams Orders, Measurements 6 GIS, SOI, GNNS  Text Book(s): 1 Jayachandran, (1964): Practical Geography (Tamil Edition) Tamil Nadu Text Book Society, Chennai. 2 Zulfequar Ahmad Khan, M. D. (1998) Text book of Practical Geography, Concept Publishing Company, New Delhi.  Reference Book(s): 1. R. P. Misra and Ramesh Fundamentals of cartography.		1		
4 Analyze the real – world physical features from the topographical sheets. 5 Identify Stream order and understand Density of Drainage Basin. 6 Understand the Landscape analysis  Specific Outcomes: 1 Plain Scales 2 Process of Compiling Maps 3 Instruments For Area Measurement 4 Representations of Heights and Various Relief Features 5 Tributaries, Streams Orders, Measurements 6 GIS, SOI, GNNS  Text Book(s): 1 Jayachandran, (1964): Practical Geography (Tamil Edition) Tamil Nadu Text Book Society, Chennai. 2 Zulfequar Ahmad Khan, M. D. (1998) Text book of Practical Geography, Concept Publishing Company, New Delhi.  Reference Book(s): 1. R. P. Misra and Ramesh Fundamentals of cartography.		Understand the map enlargement and reduction and measurement.		
5 Identify Stream order and understand Density of Drainage Basin. 6 Understand the Landscape analysis  Specific Outcomes: 1 Plain Scales 2 Process of Compiling Maps 3 Instruments For Area Measurement 4 Representations of Heights and Various Relief Features 5 Tributaries, Streams Orders, Measurements 6 GIS, SOI, GNNS  Text Book(s): 1 Jayachandran, (1964): Practical Geography (Tamil Edition) Tamil Nadu Text Book Society, Chennai. 2 Zulfequar Ahmad Khan, M. D. (1998) Text book of Practical Geography, Concept Publishing Company, New Delhi.  Reference Book(s): 1. R. P. Misra and Ramesh Fundamentals of cartography.		<del>-</del>

#### **SEMESTER-I**

### First Allied -I /Generic Elective – I Earth and Its System

FIRST ALLIED /GENERICELECTIVE-I			
EARTH AND ITS SYSTEMS			
TEACHING HOURS: 60 (4Hours, 4Credits)			
UNIT	LEARNING OBJECT		
CO1	To understand the basic concept of Universe an		and the theories
	of Evolution: Nebula, Kant and Big Bang Theo		
CO2	To understand Earth and Universe- Solar systems, Milky way Galaxy and		
CO3	Black hole theory and Meteorites  To explain the Earth Internal Structure the Core	Mantle C	fruct and also the
CO3	Earth's Magnetism	, iviantic, C	rust and also the
CO4	To illustrate about the Earth's Size, Rotation an	d Revolutio	on, causes for
	Seasons, Eclipses and Solstice		
CO5	To explain the latitude and longitude, Cardinal	•	
	and Indian Standard Time. To given an underst calculation	tanding on t	ine Time
UNIT	DETAILS	NO. OF	COURSE
		HOURS	<b>OBJECTIVES</b>
	The Universe and its Origin- Theories of		
I	Evolution: Nebula, Kant, and Big Bang	12	CO1
	Theory		
	Earth and Universe - Solar system- Galaxy		
l II	( Milky way) – Cosmobody - Black hole –	12	CO2
	Meteorites	12	002
	Earth's internal structure – Earth's crust,		
III	mantle, and core – Discontinuity- Isostasy –	12	CO3
	Earth's magnetism		
	Earth and its Size -Earth Rotation and		
IV	Revolution – Inclination Causes – (Seasons		
	Day and Night) – Summer and Winter	12	CO4
	Solstice – Eclipses		
	1		
V	Latitudes and Longitudes- Cardinal Points -	12	CO5
	Greenwich Meridian – Indian Standard time-	12	

	Time Calculation		
VI	Assessment Unit		
UNIT	LEARNING OUTCOMES		
I	Understands the origin of various theories in geography over the period identifying geographical proven theories on origin of the sun and assess the recent trend in geography and bringout the historical perspective of geography, discuss the merits and demerits of quantitative revolution		
II	Understands the changes over the universe periodically, distinguish the earth rotation and revolution and its causes explain how day and night cause, evaluates the logic behind the time calculation discuss the location of Greenwich and calculate the Indian standard timeCritically evaluate - causes of day and night,		
III	Recalls and Understands the size and position of planets, summarise with importance of direction in Geographical location		
IV	evaluate the size and position of planets, summarise with importance of direction in Geographical location(Interactive session with questions)		
V	Identifies the earth rotation and revolution and its causes explain how day and night cause, evaluate the logic behind the time calculation discuss the location of Greenwich and calculate the Indian standard time. Distinguish the concept of climate and weather, discuss the earth size and its shape in various period, assess explain the importance of latitudes and longitudes. Define the importance of direction and explain the cardinal points		
VI	Assessment Unit		
UNIT	SPECIFIC OUTCOMES		
I	Understanding of various and Related various Theories		
II	Universe and Planets and Their Satellites, Rotation		
III	Internal Forces of the Earth		
IV	Earth's Rotation, Revolution and Related Phenomena		
V	Distance Measurement, Time Evolution		
TEXT B	00K:

### SEMESTER-I

### First Allied -I /Generic Elective - I (or) Basics of Geography

SEMESTER-I			
First Allied- I / GENERIC ELECTIVE - I			
BASICS OF GEOGRAPHY			
	TEACHING HOURS: 60 (4Hours	, 4Credits)	
UNIT	LEARNING OBJECTIVES		
CO1	To enrich the basic knowledge of the Earth, and	its composit	ion, enhance the
CO2	knowledge of the structure of the atmosphere.  To explore the different the zones of Ocean with	. Montino Min	tar dantha agguira
COZ	knowledge on the deposits of Ocean	i varying wa	ter deptils, acquire
CO3	To illustrate the Natural regions of the world		
CO4	To elaborate the Evolution of humans and races		
CO5	To understand the distribution and patterns of Po		
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES
	Earth – Origin, Interior, Age, size, shape of the		
	Earth- Rocks and its Types - Atmosphere:		
I	Origin and nature, Composition and Structure	12	CO1
	of the atmosphere.		
	Continental Shelf, Continental Slope,		
	Continental Rise and Trenches - Bottom relief		
II	of Ocean – Distribution of Salinity – Ocean	12	CO2
	Currents – Ocean Deposits- Tides		
	Regions- Natural regions of the world-		
III	Equatorial, Tropical and temperate grasslands,	12	CO3
	tropical and temperate deserts, Tundra regions		
IV	Evolution of humans - Determinism and		
	Possibilism – Major races of the world- Major		
	religions of the world - Major Languages of	12	CO4
	the world – Major Tribes of India with Special		
	Reference to Tamilnadu		

	Population Distribution - Density and growth			
***	Population Problems – Migration and its	10	GO.	
V	_	12	CO5	
	types			
VI	Assessment Unit			
UNIT	LEARNING OUTCO			
	Analyse the changes over the universe periodica	•		
	rotation and revolution and its causes explain how day and night cause, <b>Recall</b> Climatic elements <b>explain</b> the composition and Structure of the Atmosphere			
I	define Insolation examine the Heat Balance con			
	Distribution of Temperature.	•		
	explains distribution of Land and Sea describes			
II	<b>composition of</b> the Ocean floor the oceanic crus <b>model of</b> Ocean Bottom relief.	ı, Group Ac	uvity <b>makes a</b>	
	model of Ocean Bottom Tener.			
	<b>Develop</b> the in depth knowledge of natural resou	rce and its i	mportance. classify	
III	the resources and human intervention and develo	pment App	lying acquired	
	knowledge marking the region in the map		.4.4.4	
	<b>Recall</b> the Natureand Scope of Human geography of Geography, <b>Understand</b> the significant significant states and the significant significant states are significant significant.			
IV	analyse the Man and environment relationship,			
	unaryse the man and environment relationship,		population data	
	Understanding the basic concepts and significance of population geography,			
V	scope of the study, its history and development in Geography. It is important			
VI	to explore student's knowledge in world population distribution			
UNIT	Assessment Unit  SPECIFIC OUTCOMES			
I	Origin of the Earth, Rocks, Structure of Atmosph			
II	Interior Structure of Oceans			
III	Major Natural Regions, Climatic Conditions, Ve	getations, M	Iode of Life Etc	
IV	Races- Caucasoid, Mongoloid, Negroid, Major I	Languages		
V	World Distribution of Populations, Migration

### First Allied II (P)/ Generic Elective - II Climatic Data Analysis

	I – SEMESTER			
	First Allied II (P)/ Generic Elective - II			
	CLIMATIC DATA ANALYSIS			
	Tarakina Harra (20 (2 Harra)			
Course	Teaching Hours : 20 (2 Hours)  Objectives:			
To Draw	the proper climatic diagram for the available climatic data. the weather map and forecast the weather.			
Unit – 1	Climatic Diagrams – types of climatic diagrams, weather maps: definition and types			
Unit – 2	Climatic data source – Representation of climatic data – Isopleths Maps (Isotherm, Isobar, Isohyets).			
Unit – 3	Climatic Diagram: – Climograph, Hythergraph, Ergo graph and Climatographs – Construction and uses.			
Unit – 4	Wind Roses: Simple wind rose, Star Diagrams, Compound wind rose, Octagonal wind rose – Rainfall Dispersion diagrams – Construction and uses.			
Unit – 5	Indian daily weather reports: Signs and Symbols – Interpretation – Synoptic weather charts.			
Unit – 6	Interpretation of Indian Weather Reports Summer – Winter – NE Monsoon – SW Monsoon			
Expected	Course Outcomes:			
1	At the end students shall be able to:			
2	Describe the climatic data using diagrams			
3	Draw suitable diagram store present climatic data			
4	Learn about the types of wind roses			
5	Interpret Indian weather reports			
6	Students understand to interpret the seasonal weather report			
Specific Outcomes				
1	Parameter of Climate, Representation of Climatic Data			

2	Source of Climatic Data, Climatic Diagram
3	Construction of Climatic Diagram
4	Diagram related to wind flow, Rainfall
5	Conventional Signs and Symbols
Text	Book(s):

# First Allied II (P)/ Generic Elective - II (or )Statistical Application for Geography

SEMESTER –I			
First Allied II (P)/ Generic Elective - II			
	STATISTICAL APPLICATIONS FOR (	GEOGRAP	PHY
	TEACHING HOURS: 60 (2 Ho	ours)	
UNIT	LEARNING OBJECTIVES		
CO1	To acquire the basic knowledge of data collection		
CO2	To understand the need of basic statistical method		
CO3	To get the knowledge diagrammatic representation		
CO4	To explore the basic knowledge of Time series a	nd moving	average
CO5	To acquire the knowledge of statistical analysis		
CO6	Assessment Unit		
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES
I	Collection of data and formation of statistical tables- Importance of cross-tabulation	12	CO1
П	Measures of Central Tendency: Mean- Median- Mode- Measures of Dispersion: Range- Mean Deviation-Standard Deviation-Rank Correlation- Coefficient of Variation.	12	CO2
III	Diagrammatic Representation of Data- Bar, Histogram – Frequency Polygon and Curve - Ogives- Lorenz Curve- Gini Coefficient	12	СОЗ
IV	Time Series – Graphical Method – Semi Average – Moving Average.	12	CO4
V	Hypothesis Testing – 'T' Test – 'F' Test – Chi- Square Test.	12	CO5
VI	Assessment Unit		
UNIT	LEARNING OUTCOMES		
I	<b>Understands</b> the Purposes of data collection and essential to choose according to the types of data study.		

П	Enriched Knowledge on basic statistical techniques such as Measures of	
	Central Tendency, and Measures of Dispersion.	
III	Understands the various Diagrammatic Representation of Data	
IV	Clarity on the time series and other graphical methods.	
V	Understands of facts of hypothesis testing and need of hypotheses in research analysis. Explore the types of hypothesis and its significance and confidence level. Examine the relationship between Parametric and Non-parametric procedures through Chi-square test, 'T' test, 'F' test, Analysis of Variance (ANOVA).	
VI	Assessment Unit	
UNIT	SPECIFIC OUTCOMES	
I	Data Collections, Tables	
II	Mean, Medium, Mode and Correlation	
III	Vertical Bar, Horizontal Bar Diagrams, Curves	
IV	Time Series Data and Related Table and Diagrams	
V	Testing of Samples

#### SEMESTER - I

### **SBE-I/ PCSEC: Mapping Techniques**

SEMESTER-I				
SBE-I / PCSEC				
	MAPPING TECHNIQUES			
UNIT	TEACHING HOURS: 60 ( 2Hours, 2 Cred LEARNING OBJECTIVES	iits)		
CO1	To understand the components of Maps and Scale Measur	ements		
CO2	To illustrate and examine the Representation of the direct		2	
CO3	To elaborate on the need for conventional signs and symb			
CO4	To enhance techniques applied in the Representation of re			
CO5	To introduce the mapping techniques applied to interpret			
UNIT	DETAILS	NO. OF	COURSE	
		HOURS	<b>OBJECTIVES</b>	
I	Map components – Maps- Types of Maps- Scales – Representative fraction and Statement of the scale-Types of scales – Plain scales – Pace scale – Time scale – comparative scale- Diagonal scale.	12	CO1	
п	Representation of direction on maps: Directions-True north, Grid, Magnetic north – Magnetic declination – Bearings – True bearing and magnetic bearing - Latitude and Longitude – International dateline – International Time Calculation - Map setting in the field – Map reading.	12	CO2	
Ш	Conventional signs and symbols- Measurement of distance (Thread- Divider- Opisometer) and Measurement of area (Graphical and strip method)- Enlargement and Reduction of maps -Combination of Maps.	12	CO3	
IV	Representation of relief on maps: Spot heights, bench mark, triangulation station -layer shading- Hachuring, hill shading and Contours- Interpolation of contours.	12	CO4	
V	Contour section drawing-Types of slopes (Uniform, Concave and Convex)-(Hill-Plateau-Ridge-Escarpment-V-shaped Valley-Waterfalls and Sand dunes) - Profiles (Serial- Superimposed -Projected-	12	CO5	

Latitude and Longitude – International dateline – Explianthe International Time Calculation - Map setting in the field – Map reading  Define the Conventional signs and symbols- calculate the Measurement of distance (Thread- Divider Opisometer) and Measurement of area (Graphical and strip method)-Enlargement and Reduction of maps -Combination of Map  The Representation of relief on maps, Spot heights, , bench mark, triangulation ,station - layer shading- and calculate the Interpolation of contours.  Understands the Contour section drawing-Types of slopes (Uniform, Concave and Convex)-(Hill Plateau-Ridge- Escarpment V-shaped Valley-Waterfalls and Sand dunes)- draw a Profiles (serial-superimposed-projected – composite).  VI Assessment Unit  UNIT SPECIFIC OUTCOMES  I Types of maps, importance of map Scales  II Directions and their importance  III Map Symbols  IV Representation of Relief Features  V Importance of Contours, Relief Features  TEXT BOOK:  1 Saha, Pijushkanti (2010): Advanced Practical Geography. Books and Allied pvt Ltd  2 Bagulia A.M (2006): Practical Geography, Anmol Pyblishers.		Composite).		
Recalls. Map components – Maps- Types of MaScale—and Statement of the scale- Types – how it is important to explore their knowledge Representative fraction and Statement of the scale – Types of scales – Plain scales – Pace scale – Time scale  Understanding of facts Representation of direction on maps – Explain the Directions-True north, Grid, Magnetic north – Magnetic declination and Identify the Latitude and Longitude – International dateline – Explianthe International Time Calculation - Map setting in the field – Map reading  Define the Conventional signs and symbols- calculate the Measurement of distance (Thread- Divider Opisometer) and Measurement of area (Graphical and strip method)-Enlargement and Reduction of maps -Combination of Map  The Representation of relief on maps, Spot heights, , bench mark, triangulation ,station - layer shading- and calculate the Interpolation of contours.  Understands the Contour section drawing-Types of slopes (Uniform, Concave and Convex)-(Hill Plateau-Ridge- Escarpment V-shaped Valley-Waterfalls and Sand dunes)- draw a Profiles (serial- superimposed-projected – composite).  VI Assessment Unit  UNIT SPECIFIC OUTCOMES  I Types of maps, importance of map Scales  II Directions and their importance III Map Symbols  IV Representation of Relief Features  V Importance of Contours, Relief Features  EEXT BOOK:  Saha, Pijushkanti (2010): Advanced Practical Geography. (2 hours, 2 credits)

#### II SEMESTER Core Course - II (P): Maps Scale and Landscape Analysis

II – SMESTER		
	Core Course - II (P)	
	Maps scaleand Landscape Analysis	
	Teaching Hours: 60 ( 4 Hours, 4 Credits)	
Course (	Objectives:	
To Under	rstand the Meaning and Construction Of Scales, Enlargement and	
Reduction	n Of Maps, Measurement of Distance and Area.	
To Famil	iarize the Students with Aspects Map, Identify and Draw the Land Forms,	
Density A	Analyzed in Drainage Basin.	
	SCALES: Meaning, Conversion of Scales – Construction of Simple	
Unit – 1	Linear Scales, Comparative	
	Scales, Diagonal Scales.	
	MAPS – Definition – Types and significance of map – Enlargement and	
Unit – 2	Reduction of Maps:	
	Square and Similar Triangular Methods.	
	MEASUREMENT OF DISTANCE: Thread, Divider and Rotometer	
Unit – 3	methods – Measurement of Area Square and Strip methods – Function of	
	Planimeter.	
	Representation of Relief: Contours – Interpolation – Method of	
Unit – 4	representation: Pictorial: Hachures and Hill Shading – Mathematical	
	Method: Spot Heights, Bench Marks, Trigonometric Stations and	
	Contours – Drawing Contour Diagrams: Uniform Slope, Concave Slope,	
	Convex Slope, Undulating Slope, Hill, Knoll, Ridge, Saddle, V – Shaped	
	Valley, Gorge, U – Shaped Valley, Cliff, Over Hanging Cliff, Cirque,	

Unit -	_ 5	Coast and Fiord Coast  Stream Analysis: Morpometric Analysis – Bifurcation ratio – Stream
	- 3	order, Length, Area Measurement and Density of Drainage Basin.
Unit -	- 6	National Atlas And Thematic Mapping Organization (NATMO) – Landscape analysis by GIS and Survey of India (SOI), GNSS, NRSA and GNSS.
Expe	cted	Course Outcomes:
1	Le	arn the basic scales and mapping knowledge.
2	Un	derstand the map enlargement and reduction and measurement.
3	Ide	entified the Map Route Length and River Length.
4	An	alyze the real – world physical features from the topographical sheets.
5	Ide	entify Stream order and understand Density of Drainage Basin.
6	Un	derstand the GIS, SOI, GNSS
Speci	fic	Outcomes:
1	Pla	in Scales
2	Pro	ocess of Compiling Maps
3	Ins	truments For Area Measurement
4	Re	presentations of Heights and Various Relief Features
5	Tri	butaries, Streams Orders, Measurements
6		S, SOI, GNNS
Text	_ i	
1		ayachandran, (1964): Practical Geography (Tamil Edition) Tamil Nadu ext Book Society, Chennai.
2		ulfequar Ahmad Khan, M. D. (1998) Text book of Practical Geography, oncept Publishing Company, New Delhi.
Refe	renc	e Book(s):
1.	R	. P. Misra and Ramesh Fundamentals of cartography.
2.	D	. R. Khullar: Essentials of practical Geography.
3.		opal Singh (1996) Map Work Practical Geography, Vikas Publishing ouse Pvt. Ltd., New Delhi.
4.	Si	ingh R. L Elements of practical Geography

#### II SEMESTER Core Course III : Climatology

SEMESTER-II				
CORE COURSE – CC III				
CLIMATOLOGY				
	TEACHING HOURS: 60 (5 Hours, 5 Cre	edits)		
UNIT	LEARNING OBJECTIVES			
CO1	To understand the basic concepts and scope of climate and	d differentia	ite the weather	
602	and climate and assess the composition of atmosphere.			
CO2	To classify the Atmospheric Pressure and Winds			
CO3	To illustrate the types of air masses and fronts  To elaborate the Atmospheric Moisture and climatic region	<b>n</b> g		
CO5	To understand the basic concepts of Cyclone and its mech			
CO6	Assessment Unit			
UNIT	DETAILS	NO. OF	COURSE	
		HOURS	<b>OBJECTIVES</b>	
	Scope and Content – Weather and Climate – Climatic			
	Elements- Atmospheric Composition and Structure-			
I		12	CO1	
	Insolation and Temperature: Factors and Distribution,			
	Heat Budget, Temperature Inversion.			
	Atmospheric Pressure and Winds: Planetary Winds,			
II	Forces affecting Winds, General Circulation of Air, Jet	12	CO2	
	Streams.			
	Air Masses- Classification of Air Masses- Fronts-			
	Classification of Fronts.		2.2.2	
III	Classification of Fiolits.	12	CO3	
	Atmospheric Moisture: Evaporation, Humidity,			
IV	Condensation, Fog and Clouds, Precipitation Types,	12	CO4	
	Stability and Instability; Climatic Regions.			
	Cyclones: Tropical Cyclones, Temperate Cyclones,			
V	Monsoon - Origin and Mechanism, El Nino – LA Nina.	12	CO5	
VI	Assessment Unit			
UNIT	LEARNING OUTCOMES	<u>l</u>	I	
	Recall Climatic elements explain the composition and S		the Atmosphere	
I define Insolation			•	
	examine the Heat Balance compares Horizontal and Vertical Distribution of			

	Temperature.	
	<b>Defines</b> Atmospheric Pressure, Compares Horizontal and Vertical Distribution of	
II	Pressure <b>draw</b> the major Pressure Belts Differentiates Planetary Winds, Periodic and Local Winds, Group Activity Make a Model on Major pressure Belts and Planetary winds.	
III	<b>illustrate</b> the formation of Jet Streams <b>summarise</b> the formation of Air Masses and Fronts.C	
IV	<b>Defines and differentiate</b> Humidity (absolute humidity, Relative humidity) <b>explains</b> Fog and its Types <b>identifies</b> Clouds (High, Medium and Low) <b>narrates</b> Forms of precipitation and Types of Rainfall (Convectional, Orographic and Cyclonic) <b>discuss</b> and <b>debate</b> on Issues in Global Climate Changes.	
V	<b>draw map for</b> Circulation of Ocean Currents and the distribution <b>Discuss and debate</b> on ElNino – LaNina	
VI	Assessment Unit	
UNIT	SPECIFIC OUTCOMES	
I	Climate elements, Temperature, Rainfall, Wind and Humidity	
II	Pressure, Forces affecting Winds	
III	Air Pressure, fronts	
IV	Types of rainfall, Forms of rainfall	
V	Cyclones, origin of cyclones impacts	
VI	Assessment Unit	
TEXT BO	OOK:	
1	Lal D.S (2006): Climatology, Chaitanya Publishing House, New Delhi.

# II SEMESTER First Allied-II (P)/ Generic Elective - II Climatic Data Analysis

	II – SMESTER			
Firs	t Allied – II (P)/ Generic Elective - CLIMATIC DATA ANALYSIS			
	Teaching Hours: 40 (3Hours, 3 Credits)			
	Objectives:			
	w the proper climatic diagram for the available climatic data.			
To Rea	d the weather map and forecast the weather.			
Unit – 1	Climatic Diagrams – types of climatic diagrams, weather maps:			
	definition and types.			
Unit – 2	1			
	Maps (Isotherm, Isobar, Isohyets).			
Unit – 3				
T I:4 1	Climatographs – Construction and uses.			
Unit – 4	Wind Roses: Simple wind rose, Star Diagrams, Compound wind rose, Octagonal wind rose – Rainfall Dispersion diagrams – Construction			
	and uses.			
Unit – 5	<u> </u>			
	Synoptic weather charts.			
Unit – 6	* *			
	Summer – Winter – NE Monsoon – SW Monsoon			
Expecte	d Course Outcomes:			
1	At the end students shall be able to explain about climatic diagrams:			
2	Describe the climatic data using diagrams			
3	Draw suitable diagram store present climatic data			
4	Learn about the types of wind roses			
5	Interpret Indian weather reports			
6	Students understand to interpret the seasonal weather report			
UNIT	SPECIFIC OUTCOMES			
1	Parameter of Climate, Representation of Climatic Data			
2	Source of Climatic Data, Climatic Diagram			
3	Construction of Climatic Diagram			
4	Diagram related to wind flow, Rainfall			

5	Conventional Signs and Symbols
6	Weather Reports
Text	Book(s):
1	D. R KULLAR Practical Geography (2002) New Academic publishing
	Jalandhar.
2	Khan, Z. A., (1998): TextBook of Practical Geography, Concept Publishing
	Company, New Delhi.
Refe	rence Book(s):
1.	Singh, R. L. and Singh, R. P. B. (2009) Elements of Practical Geography,
	Kalyani Publishers, New Delhi.
2.	Zulfequar AhmadKhan, M. D., (1998)Text book of Practical Geography,
	Concept Publishing Company, NewDelhi
3.	Gopal Singh, (1996):Map Work Practical Geography, Vikas Publishing
	House, New Delhi
4.	Monk house, F. J. and H. R. Wilkinson, (1980): Maps and Diagrams, B. I
	Publications, New Delhi.

# First Allied-II (P) /Generic Elective - II (or) Statistical Application for Geography

SEMESTER –I			
FIRST ALLIED – II (P) / GENERIC ELECTIVE-II			
	STATISTICAL APPLICATIONS FOR	GEOGRAP	PHY
	TEACHING HOURS: 60 (3 Hours	, 3 Credits)	
UNIT	LEARNING OBJECTIVES	, <u></u>	
CO1	To acquire the basic knowledge of data collection	on	
CO2	To understand the need of basic statistical method	ods	
CO3	To get the knowledge diagrammatic representat	ion of statisti	ical methods
CO4	To explore the basic knowledge of Time series	and moving	average
CO5	To acquire the knowledge of statistical analysis		
CO6	Assessment Unit		
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES
	Collection of data and formation of statistical		
I	tables- Importance of cross-tabulation	12	CO1
П	Measures of Central Tendency: Mean- Median- Mode- Measures of Dispersion: Range- Mean Deviation-Standard Deviation- Rank Correlation- Coefficient of Variation.	12	CO2
III	Diagrammatic Representation of Data- Bar, Histogram – Frequency Polygon and Curve - Ogives- Lorenz Curve- Gini Coefficient	12	CO3
IV	Time Series – Graphical Method – Semi Average – Moving Average.	12	CO4
V	Hypothesis Testing – 'T' Test – 'F' Test – Chi-Square Test.	12	CO5
VI	Assessment Unit		
UNIT	LEARNING OUTCO	OMES	
I	<b>Understands</b> the Purposes of data collection and its sources. Sampling is very		

	essential to choose according to the types of data types and the purpose of the
	study.
II	Enriched Knowledge on basic statistical techniques such as Measures of
11	Central Tendency, and Measures of Dispersion.
III	Understands the various Diagrammatic Representation of Data
IV	Clarity on the time series and other graphical methods.
V	Understands of facts of hypothesis testing and need of hypotheses in research analysis. Explore the types of hypothesis and its significance and confidence level. Examine the relationship between Parametric and Non-parametric procedures through Chi-square test, 'T' test, 'F' test, Analysis of Variance (ANOVA).
VI	Assessment Unit
TEXT I	BOOK:
1	SahaPijushkanti (2010): Advanced Practical Geography, Books and Allied
	pvt Ltd.
2	Bagulia A.M (2006): Practical Geography, Anmol Publishers.
3	Zulfequar Ahmed Khan M.D (1997): Text book of Practical Geography,
	Concept Publishing Company , New Delhi.

### First Allied - III/ Generic Elective - III Fundamentals of Cartography

II – SEMESTER			
First Allied - III / Generic Elective - III			
Fundamentals of Cartography			
	Teaching Hours: 60 (4Hours, 4 Credits)		
Course	Objectives:		
To Stud	ly the Scope and Developments of Cartography, Map Projection and		
Recent	Trends.		
To Und	erstand the Map Scales, Map Design, Layout and Digital		
Cartogi	aphy.		
Unit –	Cartography: Definition, scope and content – Map – Definition,		
Omt –	types and uses – Development of Cartography.		
	Map Scales and Projections: Determination of Map Scales –		
Unit – 2	Enlargement and Reduction – Direction and Bearings – Co –		
-	ordinate system – Projections – Classification and uses – UTM		
	importance – International Terrestrial Reference System (ITRF).		
	Map data: Collection and classification – Base Map –		
Unit – 3	Compilation – Generalization – Lambert Conformal Conic		
	Projection (LCC) – Datum, Geo – Referencing System.		
	Map Design and Layout – Symbolization – Lettering,		
Unit –	Standardization of Names – Styles – Mechanics of Map		
	Construction: Drawing materials, Equipments and instruments.		
	Thematic and Complex Mapping – Map Reproduction – Recent		
Unit – :	trends in Cartography. Computer application in Cartography –		
	Computer Mapping – Remote Sensing, GIS and GPS.		
Unit –	Survey of India (SOI), National Atlas and Thematic Map		
Ome	Organization (NATMO) – Web mapping.		
<b>Expected Course Outcomes:</b>			
1	Read and prepare the maps.		
2	Comprehend location and spatial aspects of the earth surface.		
2	Use and importance of maps for regional development and decision –		
3	making.		
4	Understand the lettering styles, methods and uses.		
5	Recent trends of the cartography Map Software's knowledge from		

	the Recent period.		
UNIT	SPECIFIC OUTCOMES		
1	Meaning of Cartography, types of maps, Development of		
	Cartography		
2	Map Scales, Determination of maps scale, Projections		
3	Base map, Compilation, generalization		
4	Map Design and Layout, Point, Line and Area Symbols		
5	Thematic Maps, Computer Graphs, Map Reproduction, Computer Mapping

### First Allied - III/ Generic Elective – III (or) Representation of Relief Features

SEMESTER-II				
FIRST ALLIED - III/ GENERIC ELECTIVE - III				
REPRESENTATION OF RELIEF FEATURES				
	TEACHING HOURS: 60 (4Hours, 4 Credits)			
UNIT	LEARNING OBJECTIVES			
CO1	To enhance the students in gaining knowledge of concepts and components			
~~~	using Drainage basin and network Morphometry			
CO2	To get an idea of Calculation of runoff			
CO3	To enhances the Calculation of hydraulic geome			
CO4	To display the new technology used to analyze Measurement of channel cross-section			
CO5	To enrich the knowledge about the Calculation of velocity			
CO6	Assessment Unit			
UNIT	DETAILS	NO. OF	COURSE	
		HOURS	<b>OBJECTIVES</b>	
	Drainage basin and network morphometry -			
I	Longitudinal profile - Hack's stream gradient	12	CO1	
	index.			
	Calculation of runoff - sediment load -			
II	sediment yield	12	CO2	
III	Calculation of hydraulic geometry equations.	12	CO3	
	Measurement of channel cross-section in the			
IV	field - study of erosional and depositional	12	CO4	
1 4	features in the field Creating sketch maps.	12		
	Calculation of velocity - discharge using			
$\mathbf{v}$	Manning equation - Estimation of unit stream	12	CO5	
	power - shear.		-	
VI	Assessment Unit			
UNIT	LEARNING OUTCOMES			

	Morphometric analysis And Gradient analysis. Explain the Smith,		
I	Robinson, Wentworth method. <b>Assume</b> Hypsometric curves . <b>Simplify</b> the		
	Terrain classification and Altimetric, Frequency curve.		
II	Hydrology, Water level fluctuation using ground water data ,Explain		
1.1	Mapping Rainfall, distribution		
III	The Contour drawing and <b>explain</b> the Serial Profiles, Superimposed,		
111	Projected and composite profile. Compile the Block Diagram		
IV	Solve Theissen Polygon Method, Isohyets method, Analyse water balance		
	graph		
V	Understanding the Estimation of unit stream power		
VI	Assessment Unit		
UNIT	SPECIFIC OUTCOMES		
I	Drainage basins, Stream Orders		
II	Runoff, Sediments		
III	Hydraulic geometry equations		
IV	Identification of channel, Erosional and Depositional Features		
V	Calculation of Velocity

### Core Course -V (P): Representation of Socio-Economic and Climatic Data

SEMESTER –III			
CORE COURSE -V (P)			
REPRESENTATION OF SOCIO ECONOMIC AND CLIMATIC DATA			
	TEACHING HOURS: 60 ( 2 Ho		
UNIT	LEARNING OBJECTIVES		
CO1	To understand the representation of Climatic Data		
CO2	To illustrate the Symbols used to interpret the Weather maps		
CO3	To differentiate the Socio-economic data using the different methods of		
	Mapping techniques.		
CO4	To elaborate on the different methods and techni-	ques of map	representation
CO5	To summarize diagrammatic representation of m	apping tech	niques using
	computer		
CO6	Assessment Unit		
UNIT	DETAILS	NO. OF	COURSE
		HOURS	<b>OBJECTIVES</b>
_	Representation of climatic data- Climatic graph	10	G 0.1
I	-Taylor's Climograph - Hyther graph - Ergo	12	CO1
	graph – simple wind rose diagrams.		
II	Weather symbols – Synoptic weather chart -	12	CO2
11	Interpretation of Indian weather report - Weather In sat - Cyclonic track.	12	CO2
	Representation of socio-economic data-		
	Distribution maps – Dot map – Mono- Circle-	12	CO3
III	Square- Sphere- block pile - Simple pyramid –		
	Flow diagram.		
	Maps - Isopleth - Choropleth - Choro-		
	schematic - Choro-chromatic - Index of	12	CO4
IV	concentration – Rainfall dispersion diagram –		
	co-efficient of variation- Lorenz curve-Gini		
	coefficient.		
	Diagrammatic representation using computer:		
$\mathbf{v}$	Bar diagram (Vertical –Horizontal- Compound	12	CO5
,	and Multiple) – Graphs( simple and poly	12	
* **	graph) -Pie –Pictorial-Star diagram.		
VI	Assessment Unit	MEC	
UNIT	LEARNING OUTCOM		T • 4 • 4 • 4
<b>T</b>	<b>Define</b> the climatic data and its representation in geography. <b>List out</b> its		
I importance climatic data in Geography, and to explore their knowl			_
	plot graphical representation from climatic and socio economic data for all		

	types of climatic graphs, ergo and hyther graph	
П	Understand the Weather elements. Outline the Temperature. Distinguish the Pressure belts . Illustrate the significance of Wind. Categories the Humidity and classify the types of Rainfall.	
III	<b>Understanding</b> of facts and basic concepts of socio economic data to represent the proper distribution maps. <b>Develop</b> the skills to develop apt map for the given data.	
IV	Understands the Concept of socio- economic data to choose apt map to depict. Index of concentration and dispersion diagram has different criteria., hence need to show unique way of drawing maps for each and every particular data. Lorenz curve and Gini coefficient has a close connection with comparing variable with grand total data.	
V	Explore the Statistical Methods with connection of geographical study to evaluate the mean and median centre for locational analysis and appreciate the featured criteria elaborately	
VI	Assessment Unit	
UNIT	SPECIFIC OUTCOMES	
I	Wind Rose Diagram	
II	Weather Symbols, Weather Chart	
III	Socio-Economic Data and Related Maps	
IV	Isopleth map- Chororpleth maps, Learning maps	
V	Computer maps	
VI	Assessment Unit

#### III SEMESTER

### ME-I/C-VI: (or) Natural Resources of The World

	III- SMESTER		
ME-I / C-VI			
	Natural Resources of The World		
	Teaching Hours: 60 (4 Hours, 4 Credits)		
Course O	bjectives:		
1. Know A	About Distribution of Natural Resources		
2. Identifie	es the Importance and Utilization of Resources for the		
Development Activities			
Resources: Concept, Scope and Content - Classification of Resources, Conservation and management of resources- Soil Resources: Classification and distribution, Fertility, Soil Erosion, and conservation, Forest Resources: Types and Distribution, Economic Important of forest.			
Unit – 2 Agricultural Resources: Types, Production and Distributio of Rice, Wheat, Tea, Coffee, Cotton and Sugarcane - White Revolution and Blue Revolution			
Unit – 3	Minerla Resources: World Distribution of Minerals, Classification of Mineral Resources, Distribution and Production of Iron Ore, Manganese, Bauxite, Gold and Silver, Power Resources; Distribution of Coal, Petroleum, Thermal and Nuclear Power Resources		
Unit – 4	Industrial Resources: Distribution and Production of Iron & Steel, Ship Building, Automobile, Chemical, Aircraft, Cotton Textile, Paper and Jute Industry Distribution of Major of the World		
Unit – 5	Transport System: Road, Rail, Air and Water Ways, Trade: International Trade and Trade organization of WTO, GATT,ITO		
Expected	Course Outcomes:		
1 Sc	oil Erosion and Conservation		
2 Ty	pes of Agriculture		

3	Distribution of Mineral Resources in the World
4	World Industrial Resources Distribution and Production
5	Transport System Analysis
UNIT	SPECIFIC OUTCOME
I	Classification of resources
II	Agricultural Resources
III	Mineral Resources
IV	Industrial Resources
V	Mode of Transport, Transport System
Refere	nce Book(s):
1.	Economic and Commercial Geography - K.K.Kharma & V.K.Gupta
2.	Alexander: Economic Geography
3.	Zimm Man: Word Resources and Industries
4.	Goh Chang Leong: Human and Economic Geography

# III SMESTER Second Allied - I / Generic Elective - IV Statistics For Geography

III- SMESTER		
Second Allie - I / Generic Elective - IV		
Statistics For Geography – I		
Teaching Hours : 60 ( 4 Hours, 4 Credits)		
	Objectives:	
	urse is to introduce the basic concepts of statistics to the students	
of Geography.		
This allied course will help the students to understand the purpose,		
meaning and use of statistics in geographical studies.		
	Introduction: Statistical Methods for Geography – Scientific	
	Method and Mathematical Notation – Descriptive Statistics –	
Unit	<b>5</b> /	
	Measures of Dispersion: Range, Variance, Standard Deviation,	
	z – score, Skewness, Kurtosis and Histograms.	
	Probability: probability Concepts – Discrete Probability	
Unit – 2	Distributions: Uniform, Binominal and Poisson Distributions –	
	Continuous Probability Distribution – Probability Models –	
	Central Limit Theorem and Confidence Intervals.	
TT 1	Hypothesis Testing and sampling: Sources of Data – Sampling	
Unit – 3	, , ,	
	Variance (ANOVA)	
	Correlation and Regression: Covariance – Person's	
Unit –	Correlation Coefficient – Spearman's Rank Correlation	
	Coefficient – Correlation and Geographic Problems –	
	Regression Analysis.	
Unit – 5	Spatial Patterns: Data Reduction: Factor Analysis and Cluster	
	Analysis.	
Unit – 6		
Expect	ed Course Outcomes:	
1	Students will frame problems using multiple mathematical and	
_	statistical representations of relevant fields of Geography	
2	It familiarizes the properties of parametric, Semi – parametric and	
	non parametric testing procedures	

The learner can apply probability and the mathematical models of statistics in Geographical research  The learner will be able to carry out appropriate hypothesis tests.  Students can perform statistical forecasting with Geospatial data.  UNIT SPECIFIC OUTCOMES  Mean, Median, Mode, various, Standard Deviation, Histograms  Probability Concepts  Hypotheses testing, Z-Test, T- Test  Correlation, regression  Data Reduction, Factor analysis, cluster Analysis  Text Book(s):  Ajai, S. G. and Sanjaya, S. G. (2009) Statistical Methods for Practice and Research, Sage Publications, New Delhi.	3	Interpreting and communicating the results from statistical

#### III SMESTER

### Second Allied - I / Generic Elective - IV (or) Transport Geography

SEMESTER – III				
SECOND ALLIED - I / ELECTIVE GENERIC -IV				
TRANSPORT GEOGRAPHY				
TEACHING HOURS: 60 (4 Hours, 4 Credits)				
UNIT	LEARNING OBJECTIVES			
CO1	To acquire basic knowledge and Scope of Transport Geography			
CO2	To elaborate the Types of Transport			
CO <sub>3</sub>	To discuss the importance of Network Characteristics of transport			
CO4	To elaborate on Theories related to freight rate st	ructure		
CO5	To illustrate the Transport system in India			
CO6	Assessment Unit  DETAILS	NO OF	COURCE	
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES	
I	Nature and Scope of Transport Geography - Importance of Transport - Development of Transport Geography - Associated factors - Transport Development - Physical, Economic, Technology.	12	CO1	
II	Types of Transport – Railways, Roads, Airways and Waterways, Pipelines.	12	CO2	
Ш	Network Characteristics – Topology - Graph Theory - Binary Matrix - Measures Of Connectivity and Accessibility.	12	CO3	
IV	Theories related to freight rate structure - Bases of Spatial interaction — Complementarily - Intervening Opportunity and Transferability.	12	CO4	
V	The transport system in India - Role of Transport in Regional development In India - Problems and prospects of Role of Transport in Regional development In India - Urban and Rural Transportation Planning and Management.	12	CO5	
VI	Assessment Unit			
UNIT	LEARNING OUTCO	MES		
I		Understands the Nature and Scope of Transport Geography – Historical development of Transport – Importance of Transport . Examine the		
II	Enhances the knowledge on the types of transpor			
III	Enriches the knowledge on the application of ne	twork analy	ysis	

IV	Understanding the Theories related to freight rate structure	
1,	Applying acquired knowledge of Transport Systems in India – Road –	
$\mathbf{V}$	Railway – Inland Water ways – <b>understand</b> the source Harbors and Ports –	
	Air Transport – Explore the Importance and Major Transport Routes –	
	Analyse the Role of Transport in Regional Development	
VI	Assessment Unit	
UNIT	SPECIFIC OUTCOMES	
I	Importance of transport, Development of Transport	
II	Types of transport	
Ш	Measure of Connectivity and accessibility	
IV	Theories related to freight rate and structure	
V	Transport System In India – Rural , Urban	
VI	Assessment Unit

### **Map Interpretation**

SEMESTER -III				
Second Allied - II (P) Discipline Specific Elective - I				
MAP INTERPRETATION				
	TEACHING HOURS: 60 ( 2 Ho	ours)		
UNIT	LEARNING OBJECTIVES			
CO1	To acquire the basic knowledge of Indian Topographical Maps			
CO2	To understand the need of basic Knowledge Topographical Signs and			
CO3	Symbols  To get the knowledge diagrammatic representation of Marginel			
COS	To get the knowledge diagrammatic representation of Marginal Information			
CO4	To explore the basic knowledge of Interpretati	on of Physi	cal Features	
CO5	To acquire the knowledge of Interpretation of C			
UNIT	DETAILS	NO. OF	COURSE	
		HOURS	<b>OBJECTIVES</b>	
	An Introduction to Indian Topographical			
I	Maps	12	CO1	
	1			
II	Indian Topographical Maps: Conventional	12	CO2	
	Signs and Symbols  Indian Topographical Maps: Marginal			
III		12	CO3	
	Information of Indian Toposheet			
	Interpretation of Physical Features From			
IV	Indian Topographical Maps	12	CO4	
V	Interpretation of Cultural Features From	12	CO5	
•	Indian Topographical Maps	12		
UNIT	LEARNING OUTCOMES			
I	After Completing the course the students should be able to Knowledge and		Knowledge and	
	understand the Indian Topographical Sheet			
II	Enriched Knowledge on basic Topographical Tools			
III	Understands the Marginal Information of India			
IV	Clarity on the Interpretation of Indian Topographical Physical Features			
V	Understands of the Interpretation of Indian Topographical Cultural			
UNIT	Features SPECIFIC OUTCOMES			
I	Indian Toposheets			
II	Conventional Signs and Symbols in Toposheets	3		
III	Marginal Information of Toposheets			
IV	Physical Features in Toposheets			

V	Cultural Features in Toposheets	
TEXT B	OOK:

	House, New Delhi	
2	Jayachandran, (1964): Practical Geography, (Tamil Edition) Tamil Nadu	
	Text Book Society	

III SEMESTER Second Allied - II (P) Discipline Specific Elective - (or)

### **Cartographic Techniques**

	III – SMESTER		
Second Allied - II(P) Discipline Specific Elective			
Cartographic Techniques			
	Allied – II* Practical		
Teaching Hours : 60 ( 2 Hours)			
Course Objectives:			
To Study of the Geographical Entity.			
	To draw different thematic maps according to the available data		
Unit –	Maps: Essentials of a Map, Classification of Map, Uses of Map  – Data – Types: Source of Data, Spatial, Non Spatial,  Quantitative and Qualitative Methods.		
Unit – 2	Unit – 2 Distribution Map: Quantitative Methods: Dot Maps: Mono and Multiple, Isopleths and Choropleth		
Unit –	Unit – 3 Qualitative Method: Choroschematic Method – Chorochromatic Method		
Unit – 4 Located Maps: Line Graph, Bar Graph, Circle, Pie Diagrams			
Unit – 5 Located Maps: Sphere, Block Diagrams, Pictorial Maps – Flow maps.			
Unit –	Unit – 6 Cartography: Mapping Software's – GIS Applications.		
Expected Course Outcomes:			
1	Understand the map and data		
2	Understand and how to draw quantitative map.		
3	Understand and how to draw qualitative map.		
4	Understand and how to draw located two – dimensional diagram.		
5	Understand and how to draw three – dimensional diagram.		
6	To Understand the Knowledge of GIS Applications		
UNIT	SPECIFIC OUTCOMES		
1	Types of maps and sources of data		
2	Distribution of Quantitative methods of maps		
3	Distribution of Qualitative methods of maps		
4	Located maps: Line, Bar, Circle and pie diagrams		
5	Located maps: Pictorial, Block diagrams		

6	Software : GIS		
Text	Text Book(s):		
1	. R. Khullar (2002), Essentials of Practical Geography, New		
	academic Publication Co., Jalandhar.		
2	. L. R. Singh (2006), Elements of Practical Geography, Sharda		
2	Pustak Bhawan, Allahabad.		
Refe	Reference Book(s):		
	. R. P. Misra, R. B. Singh, Brijesh Misra and Anupam Pandey		
1.	(2014), Fundamental of Cartography, Concept Publishing Co.		
	Pvt. Ltd., New Delhi.		

## Non Major Elective - I : Regional Geography with special Reference to Tamil Nadu

III – SMESTER			
Non Major Elective - I			
Regional Geography with special Reference to Tamil Nadu			
	Teaching Hours: 60 ( 2 Hours, 2 Credits)		
Course	e Objectives:		
	study the importance of physical features. Inderstand the resources and the distribution.		
Unit –	Location – Administrative Divisions – Physiography –		
Omt –	Drainage – climate – soil – natural vegetation.		
	Irrigation: Types and its importance – Agriculture;		
Unit –			
	Groundnut.		
TT '4	Power Resources: Hydel, Thermal, Wind, Atomic, Tidal and		
Unit –			
	ore and coal.  Industries: distribution and production: cotton textile,		
Unit –	_		
	industries		
	Population distribution: growth, Density, literacy, sex ratio		
Unit –			
	Water ways, Ports, Trade.		
T I.a. !4	Tamil Nadu million cities industries corridor Urban corridor		
Unit –	Renewable / Non – Renewable resources, WTO.		
Expect	ted Course Outcomes:		
1	Location of Tamil Nadu and its Physiography division.		
2	Importance of water resources and agriculture		
3	Power resources		
1	Significance of industries like cotton, automobile, cement and		
4	leather.		
5	Importance of population and trade & transport.		
6	Industries corridor Renewable / Non – Renewable resources.		
UNIT	SPECIFIC OUTCOMES		

1	Location of Tamil Nadu		
2	Agriculture and Irrigation		
3	Major Power Resources of Tamil Nadu		
4	Major Industries of Tamil Nadu		
5	Human Resources, Transport		
6	Renewable and Non – Renewable Resources		
Text B	ook(s):		
1	V. Kumarsamy Geography of Tamil Nadu (Tamil)		
2	Dr. N. Rajalakshmi (1999) Tamil Nadu Economic published by		
	business publication INC. Mumbai.

	<u> </u>		

III – SMESTER			
Non Major Elective - I			
Geography of Tamil Nadu			
	Teaching Hours: 60 ( 2 Hours, 2 Credits)		
Course	e Objectives:		
1	tudy the importance of physical features. nderstand the resources and the distribution.		
Unit –	Location – Administrative Divisions – Physiography – Drainage – climate – soil – natural vegetation.		
Unit –	Irrigation: Types and its importance – Agriculture; Distribution and Production of Rice, Cotton, Sugarcane, Tea, Groundnut.		
Unit –	Power Resources: Hydel, Thermal, Wind, Atomic, Tidal and its Distribution, Mineral resources: Bauxite, limestone, iron ore and coal.		
Unit –	Industries: distribution and production: cotton textile, automobile, cement and leather industries, iron and steel industries		
Unit –	Population distribution: growth, Density, literacy, sex ratio and rural and urban. Transport: Road, Railway, Airways and Water ways, Ports, Trade.		
Unit –	Tamil Nadu million cities industries corridor. Urban corridor Renewable / Non – Renewable resources, WTO.		
Expect	ted Course Outcomes:		
1	Location of Tamil Nadu and its Physiography division.		
2	Importance of water resources and agriculture		
3	Power resources		
4	Significance of industries like cotton, automobile, cement and leather.		
5	Importance of population and trade & transport.		
6	Industries corridor Renewable / Non – Renewable resources.		
UNIT	SPECIFIC OUTCOMES		
1	Administrative Division In Tamil Nadu		
2	Types of Agriculture		
3	Power Resources in Tamil Nadu		

4	Industries Distribution in Tamil Nadu		
5	Population Distribution In Tamil Nadu		
Text Book(s):			
1	V. Kumarsamy Geography of Tamil Nadu (Tamil)		
2	Dr. N. Rajalakshmi (1999) Tamil Nadu Economic published by

## Core Course V (P) - Representation of Socio-Economic and Climatic Data

SEMESTER -III			
CORE COURSE -V (P)  DEPRESENTATION OF SOCIO ECONOMIC AND CLIMATIC DATA			
REPRESENTATION OF SOCIO ECONOMIC AND CLIMATIC DATA TEACHING HOURS: 60 (4 Hours, 4 Credits)			
UNIT	LEARNING OBJECTIVES		
CO1	To understand the representation of Climatic Dat	ta	
CO2	To illustrate the Symbols used to interpret the W	eather maps	S
CO3	To differentiate the Socio-economic data using the	ne different	methods of
	Mapping techniques		
CO4	To elaborate on the different methods and techni	<del></del>	
CO5	To summarize diagrammatic representation of m	apping tech	niques using
COC	computer		
CO6	Assessment Unit	NO OF	COURCE
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES
	Representation of climatic data- Climatic graph	HOUKS	ODJECTIVES
I	-Taylor's Climograph – Hyther graph – Ergo	12	CO1
_	graph –simple wind rose diagrams.	12	
	Weather symbols – Synoptic weather chart -		
II	Interpretation of Indian weather report -	12	CO2
	Weather In sat - Cyclonic track.		
	Representation of socio-economic data-		
III	Distribution maps – Dot map – Mono- Circle-	12	CO3
	Square- Sphere- block pile - Simple pyramid –		
	Flow diagram.  Maps - Isopleth - Choropleth - Choro-		
	schematic – Choro-chromatic - Index of		
IV	concentration – Rainfall dispersion diagram –	12	CO4
	co-efficient of variation- Lorenz curve-Gini		
	coefficient.		
	Diagrammatic representation using computer:		
V	Bar diagram (Vertical –Horizontal- Compound	12	CO5
,	and Multiple) – Graphs( simple and poly		
X/I	graph) -Pie –Pictorial-Star diagram.		
UNIT	Assessment Unit  LEARNING OUTCOM	MFS	
01111	<b>Define</b> the climatic data and its representation in		List out its
_	importance climatic data in Geography, and to explore their knowledge to		
I	plot graphical <b>representation</b> from climatic and socio economic data for all		
	types of climatic graphs, ergo and hyther graph		
II	Understand the Weather elements. Outline the To	emperature.	Distinguish the
11	Pressure belts . <b>Illustrate</b> the significance of Wind	. Categories	the Humidity

	and classify the types of Rainfall.	
III	Understanding of facts and basic concepts of socio economic data to represent the proper distribution maps. <b>Develop</b> the skills to develop apt map for the given data.	
IV	Understands the Concept of socio economic data to choose apt map to depict. Index of concentration and dispersion diagram has different criteria., hence need to show unique way of drawing maps for each and every particular data. Lorenz curve and Gini coefficient has a close connection with comparing variable with grand total data.	
V	<b>Explore</b> the Statistical Methods with connection of geographical study to <b>evaluate</b> the mean and median centre for locational <b>analysis and appreciate</b> the featured criteria elaborately	
VI	Assessment Unit	
UNIT	SPECIFIC OUTCOMES	
I	Climatic Diagrams	
II	Weather Symbols	
	Socio-Economic Data; Distribution Maps	
IV	Various types of Maps	
V	Computer Based Diagrams	
VI	Assessment Unit

	SEMESTER-IV			
CORE COURSE – CC VII				
OCEANOGRAPHY				
TEACHING HOURS : 60 (5 Hours, 5 Credits)				
UNIT	LEARNING OBJECTIVES			
CO1	To understand the term Oceanography definition	n, description	n of Ocean and	
	Seas, Extent, surface configuration of the Ocean floor. To acquire wide			
	knowledge on Hypsometric curve, Continental Shelf, Continental Slope,			
	Abyssal Plain and Deeps, Trenches			
CO2	To understand and illustrate on bottom relief of Pacific, Atlantic and Indian			
CO2	Ocean and Composition of sea water.		- <b>.</b>	
CO3	To illustrate the distribution of Salinity and fact To describe the Circulation of Ocean Movement		g temperature	
CO4 CO5				
CO6	To explain the distribution of Ocean deposits and Assessment Unit	d resources		
UNIT	DETAILS	NO. OF	COURSE	
UNII	DETAILS	HOURS	<b>OBJECTIVES</b>	
	Oceanography: Definition, Oceans and seas -	110010		
	Extent and distribution – Surface configuration			
I	of the Ocean floor, Hypsometric curve –	12	CO1	
	Continental shelf – Continental slope –			
	Abyssal Plain – Deeps and Trenches.			
	Bottom Relief of the Pacific, Atlantic and			
II	Indian Oceans, Sea water – Composition of	12	CO2	
	sea water.			
	Ocean Temperature and Salinity: Distribution			
III	and factors – Horizontal and vertical - Factors	12	CO3	
	affecting temperature and salinity distribution.			
11.7	Ocean Water Movement – Waves – Tides:	10	CO4	
IV	Types - Ocean Currents: Types - Currents of	12	CO4	
	Pacific, Atlantic and Indian Oceans.  Ocean Deposits: Types - Coral Reefs:			
	Formation and types - Ocean resources and			
$\mathbf{V}$	need for conservation - National Institute of	12	CO5	
	Ocean Technology (NIOT).			
VI	Assessment Unit			
UNIT	LEARNING OUTCO	MES		
	<b>Define</b> oceanography, <b>explains</b> distribution of L		describes the	
I	structure.			
TT	Understands composition of the Ocean floor th	e oceanic ci	rust, Group	
II	Activity makes a model of Ocean Bottom relief			
	<b>Describes</b> the composition of sea water <b>list out</b>	the factors (	Governing sea	
III	Temperature, illustrate the variation in Temperature distribution			
	(Horizontal and Vertical Distribution)			
IV	Distribution <b>distinguishes</b> the types of waves W	aves – (Dee	p water waves –	

	Long waves – Seismic sea waves – Tide waves – Transitional waves)		
	<b>differentiate</b> Tides – (High tide and Low tide – Neap Tide – Spring tide),		
	draw map for Circulation of Ocean Currents and the distribution Discuss		
	and debate on ElNino – LaNina		
	Analyses the different Ocean Deposits and identifies the Types of Coral		
V	Reefs-Formation and types describes the need for Ocean resources and need		
	for conservation		
VI	Assessment Unit		
UNIT	SPECIFIC OUTCOMES		
I	Relief Features in Oceans		
II	Continental shelf, Slope, Abyssal Plain, Deeps, Trenches, Ridges of major		
11	oceans		
III	Ocean Temperature, Salinity		
IV	Warm Current, Cold Currents in the Oceans

#### IV SEMESTER

### Second Allied - II (P) Discipline Specific Elective - I Map Interpretation

SEMESTER –IV			
SI	SECOND ALLIED - II (P) DISCIPLINE SPECIFIC ELECTIVE - I		
	MAP INTERPRETATION		
	TEACHING HOURS: 60 (3 Hours, 3 Credits)		
UNIT	LEARNING OBJECTIVES		
CO1	To acquire the basic knowledge of Indian Topo	graphical N	Maps
CO2	To understand the need of basic Knowledge Topographical Signs and Symbols		
CO3	To get the knowledge diagrammatic representation of Marginal Information		
CO4	To explore the basic knowledge of Interpretati	on of Physi	cal Features
CO5	To acquire the knowledge of Interpretation of C		
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES
I	An Introduction to Indian Topographical Maps	12	CO1
II	Indian Topographical Maps : Conventional Signs and Symbols	12	CO2
III	Indian Topographical Maps : Marginal Information of Indian Toposheet	12	CO3
IV	Interpretation of Physical Features From Indian Topographical Maps	12	CO4
V	Interpretation of Cultural Features From Indian Topographical Maps	12	CO5
UNIT	LEARNING OUTCOMES		
I	After Completing the course the students should be able to Knowledge and understand the Indian Topographical Sheet		
II	Enriched Knowledge on basic Topographical T	Tools	
III	Understands the Marginal Information of India	-	
IV	Clarity on the Interpretation of Indian Topograp		
V	<b>Understands</b> of the Interpretation of Indian Topographical Cultural Features		

UNIT	SPECIFIC OUTCOMES	
I	Indian Toposheets	
II	Conventional Signs and Symbols in Toposheets	
III	Marginal Information of Toposheets	
IV	Physical Features in Toposheets	
V	Cultural Features in Toposheets	
TEXT B	OOK:

#### IV SEMESTER

### Second Allied - II (P) Discipline Specific Elective - I (or) Cartographic Techniques

	IV – SMESTER		
SECOND ALLIED - II (P) DISCIPLINE SPECIFIC ELECTIVE - I			
Cartographic Techniques			
	Teaching Hours: 60 (3 Hours, 3 Credits)		
Course	Objectives:		
To Stud	ly of the Geographical Entity.		
	w different thematic maps according to the available data		
   TT ', /	Maps: Essentials of a Map, Classification of Map, Uses of		
Unit –			
	Quantitative and Qualitative Methods.  Distribution Map: Quantitative Methods: Dot Maps: Mono		
Unit – 2	and Multiple, Isopleths and Choropleth		
TT:4 (	Qualitative Method: Charoschematic Method -		
Unit – 3	Chorochromatic Method		
Unit –	Located Maps: Line Graph, Bar Graph, Circle, Pie Diagrams		
Unit – 3	Located Maps: Sphere, Block Diagrams, Pictorial Maps –		
	Flow maps.		
Unit – (			
	ed Course Outcomes:		
1	Understand the map and data		
2	Understand and how to draw quantitative map.		
3	Understand and how to draw qualitative map.		
4	Understand and how to draw located two – dimensional diagram.		
5	Understand and how to draw three – dimensional diagram.		
UNIT	SPECIFIC OUTCOMES		
1	Types of maps and sources of data		
2	Distribution of Quantitative methods of maps		
3	Distribution of Qualitative methods of maps		
4	Located maps: Line, Bar, Circle and pie diagrams		
	5 Located maps : Pictorial, Block diagrams		
Text Book(s):			

1	. R. Khullar (2002), Essentials of Practical Geography, New academic Publication Co., Jalandhar.

### IV SEMESTER Second Allied - III / Discipline Specific Elective - II Human Geography

	SEMESTER-IV		
	SECOND ALLIED - III/ DISCIPLINE SPECIFIC ELEC	CTIVE - II	
	HUMAN GEOGRAPHY		
UNIT	TEACHING HOURS: 60 (4 Hours, 3 Credits)	)	
CO1	LEARNING OBJECTIVES  To understand the basic concents of Human Goography and assess the		
COI	To understand the basic concepts of Human Geography and assess the relationship between Man and Environment.		
CO2	To elaborate the school of thoughts		
CO3	To discuss the distribution of Major Human Races in World		
CO4	To illustrate the World Major Religions		
CO5	To compare and distinguish the World Major Languages and Lan	guage groups	
CO6	Assessment Unit		
UNIT	DETAILS	NO. OF HOURS	COURS E OBJEC TIVES
I	Human Geography – Nature, Scope and Significance of Human Geography – Man and Environment Relationship.	12	CO1
п	Schools of Thoughts: Determinism, Neo  Determinism ,Possibilism - French - German - British - UK -  Humanism - Behaviorism.	12	CO2
III	Major Human Races in World – Classification of Major Races – Caucasoid - Mongoloid – Negroid – Racial Parameters and indices.	12	CO3
IV	World Major Religions: Religion distribution – Hinduism - Buddhism – Jainism - Christianity- Islam- Religions in India.	12	CO4
V	World Major Languages and Language groups - Tamil,	12	CO5

	Chinese, English - Hindi - Arabic - German- French and		
	Portuguese.		
	1 ortuguese.		
VI	Assessment Unit		CO6
UNIT	LEARNING OUTCOMES		
	Recall the Nature and Scope of Human geography, compare w	ith the other b	ranch of
_	Geography, Understand the significance of Human geograph	y, analysethe	Man and
environment relationship, <b>explain</b> the theories of population, <b>example</b> populationdata			ine the
TT	Understands the basis of the study of Geography through the ela	aborate	
II	understanding of the School of thoughts		
	Explain the distribution of Major human races in the world, compare World		
	Distribution of Races, analyseRacial parameters and indices( S	Shape, Skull, F	ace,
III	Nose, Stature,, <b>examine</b> White (Caucasian), <b>Classifying</b> Asian(Mongoloid), outline the Black(Negroid		
	Group discussion Classification of Races		
***	Recall the Major Religions, explain Hinduism, Buddhism, Jainism		
IV	<b>examine</b> the Religious distribution around the world, <b>compare</b> La and Dialectics.	anguages, Verr	nacular
	estimate the distribution of Language groups ( Chinese, Spanish, 1	English Hindi	Arabic
V	German, French and Portuguese	English, Timal,	, i Huoic
VI	Assessment Unit		
UNIT	SPECIFIC OUTCOMES		
1	Scope of human Geography		
2	Determinism and Possibilism		
3 4	Distribution of Religion in the World  Major Longuage Distribution in the World		
5	Major Language Distribution in the World  Language Groups in the World

### 

IV – SMESTER			
SEC	SECOND ALLIED - III/ DISCIPLINE SPECIFIC ELECTIVE - II		
	SOCIAL GEOGRAPHY		
	Teahing Hours: 60 (4Hours, 3 Credits)		
Course	Objectives:		
To study the Social Geography how to relate to man, and their social activities,			
To exa	mine the spatial distribution of tribes of the India.		
Unit –	Definition, Nature and scope of Social Geography – Social Structure and social process.		
	Social Well being: Social Geography of inclusion and		
Unit – 2	exclusion – inclusion: healthcare, housing and education –		
	exclusion: slums, communal, conflicts and crime.		
	Elements of social geography: Ethnicity, Race, Tribe, Dialect,		
Unit – (	Languages, Caste, Religion – Distribution of Race and		
	Physical characteristics (Caucasoids, Mongoloids and		
	Negroids)  Distribution of Pasial Groups, Nagritas, Proto, Australaids		
Unit –	Distribution of Racial Groups: Negritos, Proto – Australoids, Mongoloids, Mediterraneans, Brachycephals and Nordics		
	(India).		
	Indian Tribes and their Distribution – Characteristics of some		
Unit – :			
	Pathology – Health care planning and policies in India.		
Unit –	Social Discrimination and Differentiation – religion, caste,		
Omi – (	education, housing and food.		
Expect	ed Course Outcomes:		
1	Importance and development of social geography		
2	Understand the social well being of inclusion and exclusion		
3	Elements of social geography and their characteristics.		
4	Evolution of man and races in India.		
5	Identify different types of Indian Tribes and Their Distribution		

UNIT	SPECIFIC OUTCOMES	
1	Definition of Social Geography, Social Structure, Process	
2	Health care, Housing, Education, Slum, Crimes	
3	Distribution of races and Ethnicity	
4	Distribution of Racial Groups	
5	Indian Tribes and their Characteristics	
Text B	ook(s):	
1	Jyotirmoy Sen., (2019): A Text Book of Social and Cultural	
1	Geography, Kalyani Publishers, New Delhi

IV SEMESTER

NMSDC-II ( 2 Hours, 2 Credits)

### V SEMESTER Core Course -VIII : Geography of India

	SEMESTER – V		
	CORE COURSE – CC VIII GEOGRAPHY OF INDIA		
	TEACHING HOURS : 60 ( 5 Hours, 5 Credits)		
UNIT	LEARNING OBJECTIVES		
CO1	To elaborate on the Location and Physiography	of India	
CO2	To understand the climate and soil distribution of India		
CO3	To illustrate the agricultural distribution of India	and the nee	d for geographical
	factors for crop production.		
CO4	To distinguish the metallic and non metallic minerals, and understand the		nderstand the
CO.	distribution of Indian Industries.		
CO5	To elaborate the distribution of population and transport in India		ndıa
CO6	Assessment Unit	NO OF	COUDGE
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES
I	Location – Frontiers- Neighbouring Countries- Physiography -Himalayas, Western Ghats and the Eastern Ghats –Plateau - East Coastal Plain, West coastal plain and Islands - Rivers :Northern (Peninsular) and Southern (Non Peninsular).	12	CO1
п	Climate –Seasons, Monsoons, Rainfall Pattern and Distribution of Rainfall. Soil- Types of Soil- Natural Vegetation- Tropical Forest, Sub Tropical Forest, Evergreen Forest, Mangrove, Thorny Forest.	12	CO2
Ш	Agriculture – Geographical Requirements of Crops – Rice - Wheat – Oilseeds – Sugarcane – Cotton - Jute - Tea – Coffee – Rubber - Livestock – Fisheries- Irrigation – Types – Multipurpose Projects.	12	CO3
IV	Minerals – Metallic and Non-Metallic Minerals - Iron – Manganese – Bauxite- Copper- Mica- Illuminate- Energy (Hydel, Thermal and Atomic) - Industries- Iron & Steel – Textiles – Paper — Shipbuilding – Locomotives – Cement – Fertilizer- Major Industrial Regions of India.	12	CO4
V	Population – Distribution - Density and growth –Population Problems - Transport – Roadways	12	CO5

VI	Assessment Unit		
UNIT	LEARNING OUTCOMES		
	<b>Recall</b> the geographic location and compare the neighbouring countries and compare its strategic importance, <b>classifying</b> the nature and extent of		
I	Himalayan rages, identifying the resource of various elevation, compare the		
1	northern perennial and southern non perennial rivers, assess the coastal stretch		
	and its importance, estimate island resource Indian seas and oceans		
	<b>Distinguish</b> the concept of climate and weather, <b>explain</b> the intensity of		
II	Indian Monsoon, <b>Evaluate</b> the amount and pattern of rainfall, analyse the		
	tropical cyclones over Indian coasts,		
	the agricultural regions, <b>classifying</b> the food crops and non food crops of		
III	India, identifying the cropping pattern and its distribution, assess the		
	production based on rainfallexplain the types of irrigation, assess the hydro		
	electric power generation,		
IV	classifying the minerals- metallic and non metalic, estimates the hydel power		
1 V	generation Assess the thermal power and atomic power generation ,Analyse		
	the major industrial regions and its importance in economic growth  Identifies the demography of India, estimate the amount and pattern of rainfal		
	in India ,discuss the problems of urbanization, compare the means of		
$\mathbf{V}$	transport, understand the strategic importance of sea routes evaluate the		
	imports and exports		
VI	Assessment Unit		
UNIT	SPECIFIC OUTCOMES		
1	Location of India, Neighboring Countries, Physical Structure		
2	Climate Seasons, Distribution of Rainfall, Soil, Natural Vegetation		
3	Agricultural Patterns, Various Crops		
4	Mineral Based Industries		
5	Human Resources, Transport System, trade

## V SEMESTER Core Course -IX : Population Geography

V – SMESTER			
	Core Course - IX		
	Population Geography		
	Teaching Hours: 60 (5 Hours, 5 Credits)		
Course Object	Course Objectives:		
population dat	designed to gain knowledge thorough understanding to the ta population – distribution. Density Demographic structure, ia over, under population and problems.		
	Population Geography Nature Scope and Development of population Geography population data sources and methods of data collection.		
Unit – 2	Composition of population Demographic Structure – Rural and Urban copulation Composition – major races.		
Unit – 3	Population policy with reference to India over population, under population and problems.		
	Population Growth Distribution of populations, Density and factors controlling population growth – population problems.		
	Migration – Types causes and effects of Migration.		
	Population policy with reference to India over population, under population and problems.		
<b>Expected Cou</b>	urse Outcomes:		
1 Available sources of populations data			
2 Popul	ation Growth, Distribution, Density and factors controlling problems.		
3 Demo	Demographic structure Rural – Urban population.		
	ation Types and Courses		
5 Theor	ries of Population.		
6 Availa	able sources of populations data		
	CIFIC OUTCOMES		
1 Devel	lopment of Population Geography, Population Data		
	ographic Structure		
	ation Policies, Population Problems		
	ting factors of population and Distribution, Problems		
5 Migra	ation, Causes, Types, Consequences		
Reference Bo	ook(s):

### V SEMESTER Core Course- X : Settlement Geography

	V-SMESTER		
	Core Course: X		
	Settlement Geography		
	Teaching Hours: 60 ( 6 Hours, 5 Credits)		
Course Ob	jectives:		
_	in the formation and principles of settlements. the distribution, pattern, and characteristics of settlements.		
Unit – 1	Settlement Geography: Meaning, Nature, Scope and development of Settlement: Origin – Site and situation of Settlements types – Fundamental concepts in settlement Geography.		
Unit – 2	Rural Settlement: Meaning, Factors affecting Rural settlements – Origin and evolution of Rural settlements – Types – Size and spacing of Settlements – Rural Morphology: Patterns – Housing Types – Contemporary problems of Rural settlements (Rural – Urban Migration: Land use changes: Land acquisition and Transaction – Theory of Rural settlement location(JC HUDSON 1969)		
Unit – 3	Urban Settlement: Meaning – Factors affecting site and situation of Towns – functional classification of Towns by HJ Nelson – Urbanization: – factors – Urbanization in India and World – Central Business District(CBD), Functions and Characteristics of CBD		
Unit – 4	Urban Morphology: Urban Land Use Models – Concentric (Emest Burgess 1925), Sector (Homer Hoyt 1939) and Multiple Nuclei Model (Harris and Edward Ullman 1945) – Rural – Urban fringe – Urban Hierarchy – Primate City – Rank – Size rule – Christallers central place theory.		
Unit – 5	Urban Issues: Water, Energy, Housing, Health – Urban Slums – Transport, Environment issues – Town and country planning and restructuring		
Unit – 6	Recent and Future Development: Smart growth – Smart City –		

	Definition – History of the Smart city – Technology used in smart Cities – Challenges and Opportunities Future of Smart city
Expect	ed Course Outcomes:
. 1	Discuss about the Settlement, Types and fundamental concepts in
1	Settlement geography
2	Learn the concepts, characteristics and factors, Types and Patterns, Rural problem
3	Learn about the Urbanization in India and the World
4	Learn about Urban functions and characteristics, Urban Morphology
5	Study about the problem of urbanization
6	Get knowledge about the recent and future growth of smart cities.
UNIT	SPECIFIC OUTCOMES
1	Origin Of Settlements, Site and Situations, Types, Concepts
2	Rural Settlements, Types, Housing Types, Contemporary Problem
3	Urban Settlements, Origin of towns, Classification of Towns
4	Various Urban Land Use Models
5	Problems in Urban Areas, Towns and Country Planning

# V SEMESTER Core Course-XI (P): Map Projection

V- SMESTER			
Core Course - XI (P)			
Map Projection			
	Teaching Hours: 60 ( 5 Hours, 5 Credits )		
Course Ob	ojectives:		
1. T	To Understand the principles, construction and classification of map		
p	projections		
	To transfer whole or part of the Earth into a plane surface with		
S	uitable map projection.		
	Map Projections: – General Principles, Classification, Choice		
Unit – 1	of Projection: - Construction of the following projection with		
	limitation and uses.		
Unit – 2	Construction of Zenithal Projection: Equidistant, Equal area,		
	Gnomonic, Orthographic (or) Stereographic Projections.		
Unit – 3	Construction of Cylindrical Projection: Equidistant, Equal area		
	and Mercator's Projections.		
Unit – 4	Construction of Simple Conical Projections with One and Two		
	Standard Parallels, Bone's and Polyconic Projections.		
Unit – 5	Construction of Sinusoidal and Mollweide's Projections		
	(normal) and Interrupted sinusoidal and Mollweide's projection.		
Unit – 6	Assessment (Universal Transverse Mercator (UTM) and World		
	Geodetic System 84 (WGS84) projections and its uses.)		
Expected (	Course Outcomes:		
1	Complete knowledge on principles and classifications of map		
	projections		
2	Hands-on exercises for construction of Zenithal and cylindrical		
	projections		
3	Draw conical and conventional projections for the whole or part		
	of Earth.		
4	Draw a Conical Projection One and two Standard		
5	Construction of Sinusoidal and Mollwide's projections		
6	Assessment		
UNIT	SPECIFIC OUTCOMES		
1	Map Projections, Principles, Classificatioons		

2	Zenithal Projections, Properties	
3	Cylindrical Projections, Properties	
4	Conical Projections mid latitude zone that have an east-west	
orientations Sinvapidal projections release projects Mallyveida Projection		
5	Sinusoidal projections poles an points, Mollweide Projection Commonly used in Small scale maps and Thematic maps

# V SEMESTER ME- II/ Discipline Specific Elective - III Basics of GIS

SEMESTER V				
ME-II/ DISCIPLINE SPECIFIC ELECTIVE - IIII				
	BASICS OF GIS TEACHING HOURS: 60 (5 Hours.	2 Credite		
UNIT	LEARNING OBJECTIVES	, 5 Credits )		
CO1	To acquire the knowledge on the development o	f GIS		
CO2	To distinguish between the significance of Spati		patial data	
CO3	To understand the importance of DBMS			
CO4	To update the recent trends on GIS analysis			
CO5	To explore the application of GIS and its softwar	res		
CO6	Assessment Unit			
UNIT	DETAILS	NO. OF	COURSE	
		HOURS	OBJECTIVES	
I	Geographical Information System: Definition  –Historical development - Components of GIS- data storage and manipulation – data transformation – data output devices.	12	CO1	
II	Spatial and Non- spatial Data, Raster and Vector Data Structure. Comparison of raster and vector data.Geographical coordinate systems of earth: UTM.	12	CO2	
III	DBMS – components - query - digitization – editing – topology – layout preparation.	12	CO3	
IV	GIS analysis: Single layer analysis: butter – interpolation, multilayer analysis: overlay analysis, network analysis, WebGIS(A Basic Introduction).	12	CO4	
V	Application of GIS and GIS Softwares; Land use/ Land cover/ Urban sprawl /Agriculture and environment. Disaster; Arc view, Arc GIS, ILWIS, GRASS, QGIS, ENVIS.	12	CO5	
VI	Assessment Unit			
UNIT	LEARNING OUTCO			
I	Recalls maps and its importance in daily life, understand Geography as Spatial science and GIS concepts, define GIS, trace the history and development of GIS, lists the Components of GIS			
II	List Basic Data Models, (Spatial and Non-spatial Data, Raster and Vector			

III The need and importance of DBMS in the study of GIS			
	The need and importance of DBMS in the study of GIS		
IV Knowledge on basic introduction of Web GIS	Knowledge on basic introduction of Web GIS		
List GIS Software s (CAD- GIS-ARC GIS, ARC VIEW, MAP INFO, G	List GIS Software s (CAD- GIS-ARC GIS, ARC VIEW, MAP INFO, GRASS		
v and QGIS) Summarise GIS application (Environmental and National			
Resources Management, Planning and Engineering, Land Information Sy	Resources Management, Planning and Engineering, Land Information System,		
Urban Planning)

	Remote Sensing – Definition and types- History of Remote Sensing in India – Remote		
I	Sensing Processes – Electromagnetic	12	CO1
1	Spectrum, Atmospheric Window – Plat Forms	12	001
	and its types.		
	Fundamentals of Aerial and Satellite Remote		
II	Sensing- Aerial Photography and Scale of	12	CO2
11	Aerial Photographs and its types – types of	12	CO2
	Satellites.		
	Resolution: Spectral, Spatial, Radiometric and		
III	Temporal- Marginal Information of Aerial	12	CO3
	Photographs and Satellite Images.		
137	Application of Remote Sensing; Land use/	10	004
IV	Land cover/ Urban sprawl Agriculture and	12	CO4
	environment.  Global Navigation Satallita System: Sagments:		
	Global Navigation Satellite System: Segments: space segment - GPS Satellite systems – New		
	Programmes – IRNSS - Control segment -		
$\mathbf{v}$	Satellite tracking - User segment - Modern	12	CO5
•	survey instruments – Error sources – Satellite	14	
	augmented systems - DGPS - GNSS		
	Applications.		
VI	Assessment Unit		
UNIT	LEARNING OUTCOMES		
I	<b>Define</b> Remote Sensing, <b>describe</b> the Principles of Remote Sensing,		

	,
	memorize the bands in Electromagnetic, <b>Distinguish</b> between Radiation
	Interaction with Atmosphere and Earth Surface-Interaction, Distinguish
	between the types of Remote sensing based on platform, Energy sources,
	Imaging media, regions of Electromagnetic spectrum.
II	Acquires knowledge about the types of resolutions and information of satellite
11	and aerial photographs.
	<b>Define</b> Microwave Remote sensing, <b>differentiate</b> between Passive and Active
III	Microwave Remote Sensing, distinguish between Airborne versus space bore
	radars correlate the images from SLAR and SAR System
	Summarise application of Remote Sensing in Land Cover and Land use
IV	mapping, <b>Distinguish</b> Change detection in land use, Water, Forest,
	Agriculture, Environmental Impact assessment and Urban planning
V	Introduction of Global Navigation Satellite System(GNSS) gives a wide
	knowledge about the application of GPS and its uses.
VI	Assessment Unit
UNIT	SPECIFIC OUTCOMES
I	Remote sensing process
II	Aerial Photos and Its Types
III	Resolution and its Types
IV	Application of remote sensing: Land use and Land cover
V	GPS, GNNS and Application
VI	Assessment

#### **CORE COURSE XIII: SOCIAL AND CULTURAL GEOGRAPHY**

SEMESTER -VI			
	CORE COURSE – CC XIII		
	SOCIAL AND CULTURAL GEOG		
	TEACHING HOURS : 60 ( 6 Hours,		
UNIT	LEARNING OBJECTIVES	<u> </u>	
CO1	To acquire basic knowledge on the social structu	re and socie	ety
CO2	To elaborate the spatial distribution of Ethnicity,	Language,	Caste and
	Religion		
CO3	To discuss the social welfare and well being		
CO4	To distinguish on the races and cultural diffusion		d
CO5	To assess the Human development indicators an	a its Index	
CO6 UNIT	Assessment Unit  DETAILS	NO. OF	COURSE
UINII	DETAILS	HOURS	OBJECTIVES
	Introduction: Nature and Scope of Social	пость	OBSECTIVES
I	Geography - Concepts of Social Geography -	12	CO1
1	Social Structure (Family, Marriage, Kinship)	12	COI
	and Processes - Rural and urban society.		
	Spatial distribution of Ethnicity, Tribe, Dialect,		
II	Language, Caste and Religion in the World	12	CO2
11		12	CO2
	with special reference to India.		
	Welfare and Social Well being: Quality of		
III	Life – Health- Education – Economic Status –	12	CO3
111		1.2	CO3
	Gender – Wellbeing of Women.		
	Cultural geography :Concept of Culture,		
	Evolution of Human beings – Major Races of		
IV	the world- Culture Interaction and diffusion –	12	CO4
	Culture Exchange.		
	Measurement of Human Development -		
$\mathbf{V}$	Social, Economic and Environmental	12	CO5
	Decimi, Decimine and Environmental		

	Indicators –Human Development Index.		
VI	Assessment Unit		
UNIT	LEARNING OUTCOMES		
I	Broadens knowledge of the Concepts of Social Geography		
II	Enhances the knowledge about the Spatial distribution of ethnicity.		
III	Enriches the knowledge about the Social welfare and social well being		
	<b>Recalls</b> and memorize the framework of cultural Geography and its		
IV	importance in Geography, it is important to <b>explore</b> their knowledge in culture		
	of the world in order to map the social map of the world		
$\mathbf{v}$	Acquires the information about the indicators – social, economic and		
	environmental.		
VI	Assessment Unit		
UNIT	SPECIFIC OUTCOMES		
I	Scope and content of Social Geography		
II	Language and Religious Distribution In the World		
III	Social Well Being: Health, Education, Economic Status		
IV	Cultural and Major Races Distribution in the World		
V	Measurement of Human Development		
-	VI Assessment

#### **CORE COURSE XIV: POLITICAL GEOGRAPHY**

SEMESTER -VI					
CORE COURSE – CC XIV					
POLITICAL GEOGRAPHY TEACHDIC HOURS - (0 (5 Hours 5 Condita)					
UNIT	TEACHING HOURS: 60 (5 Hours, 5 Credits) UNIT   LEARNING OBJECTIVES				
CO1	To acquire basic knowledge on the Political Geo	oranhy			
CO2	To elaborate the spatial distribution of Core Are		al Geography		
CO3	To discuss the importance of Boundaries and Front Tourist Tour		n evegrupiij		
CO4	To elaborate on Geography of Elections				
CO5	To illustrate the Political Geography of India				
CO6	Assessment Unit				
UNIT	DETAILS	NO. OF HOURS	COURSE OBJECTIVES		
I	Political Geography: Definition, Scope, Content and Development – Geopolitics - State: Categories -Powers and Functions - Nations and Nationalism.	12	CO1		
II	Core Areas: Types – Capitals: Types – Morphological classification – Factors of Development, Federal Capitals – New and Neutral Capitals – Capitals in Post -1945 federations.	12	CO2		
III	Boundaries and Frontiers: Definition – Classification: Genetic and Functional – Morphological Classification (Buffer Zone – Land locked Countries) – Border Disputes.	12	CO3		
IV	Electoral Geography: Geography of Elections  - Election Campaigning - Voting Pattern - Voters' Participation - Gerry Mandering - Election Commission.	12	CO4		
V	Political Geography of India: Integration of Indian States: Integration of Sikkim – India's Bilateral Relationship with Pakistan and Sri Lanka – SAARC Countries - India's Foreign Policies.	12	CO5		
VI	Assessment Unit				
UNIT	LEARNING OUTCO				
I	<b>Acquire</b> knowledge on the basic concepts of Political Geography and its importance and scope in Geography, it is important to <b>explore</b> their knowledge				

	in various phases of political Geography
II	Enhances the knowledge on Morphological classification - Factors of
111	Development, Federal Capitals
	Understands the facts and ideas of various political areas of our Territory,
III	State, Nation and the world. <b>Acquire</b> through knowledge on frontiers and
	boundaries.
IV	Understands the concept of electoral Geography. Examine the subjective
	aspects of electoral divisions of India
V	Summaries the knowledge on political geography of India and need for
	SAARC
VI	Assessment Unit
UNIT	SPECIFIC OUTCOMES
I	Geopolitics: State Level
II	Capital and Morphological Classification
III	Boundaries (Buffer Zones land Locked Countries)
IV	Election Campaigning – Voting Patterns and Voter's Participations
V	Bilateral Relationship with Pakistan and Sri Lanka
VI	Assessment

# **CORE COURSE XV(P): SURVEYING**

VI CMECTED			
VI – SMESTER			
Core Course XV (P)			
		SURVEYING To be the following to the survey of the survey	
Carrena	. ()	Teaching Hours: 60 ( 6 Hours, 5 Credits)	
Course	e Ot	ojectives:	
To Uno	dersi	tand the surveying instruments	
		t survey for primary data collection.	
T		Introduction of surveying – chain surveying- use- equipments,	
Unit –	1	chain traverse: principles, the procedures, taking offsets, field	
		book, preparation of map.	
T India	2	Prismatic compass surveying- lines of reference, magnetic	
Unit –	2	bearings- taking bearings- compass traverse- open and closed,	
Unit –	2	compass sketch survey- closing error and its correction  Plane table surveying- methods of surveying- open traverse.	
Unit –		Dumpy level surveying- method and use, use profile leveling.	
		Indian clinometers and the Abney level-procedures-	
Unit –	5	measurement of elevation and depression	
Unit –	6	Google earth, Drone.	
		·	
1	Expected Course Outcomes:  Students know about basics of chain survey		
2		idents will have knowledge about prismatic compass survey	
3			
4	Students able t conduct plane table survey		
4		idents will have knowledge dumpy level survey	
5		Students able to conduct the survey of Clinometer and Abney	
Level  Ctudents will have be eviled as about letest suggest to shair as a			
6		idents will have knowledge about latest survey techniques	
UNIT		ECIFIC OUTCOMES	
1		rays Open Trayerse Clased Trayerse Field Work Propagation	
1	1	rows, Open Traverse, Closed Traverse, Field Work Preparation Plains	
	OI	riallis	

2	Prismatic Compass, Bearing, Open Traverse, Closed Traverse, Closing Arrows And its Correction
3	Plans Table and its Accessories, Surveying Methods
4	Dumpy level surveying, Methods, Profile Leveling
5	Indian Clino meter and planetary level survey, angle of elevation and depression

#### ME - III / DISCIPLINE SPECIFIC ELECTIVE - IV BIO GEOGRAPHY

VI – SMESTER		
ME - III / DISCIPLINE SPECIFIC ELECTIVE - IV		
	BIOGEOGRAPHY	
	Teaching Hours: 60 (5 Hours, 3 Credits)	
Course Ob	jectives:	
•	about principles and processes going on in our environment. fy the importance of animals and plants.	
Unit – 1	Introduction to Biogeography: Nature, Scope and Components - Significance and development of Biogeography, Paleo biogeography – Environment, habitat and plant animal association, Biome types – Soils: Genesis of soils, Classification and Distribution of soils, Soil profile and Soil erosion.	
Unit – 2	Darwin theory of evolution laws of thermodynamics – Biogeochemical cycle, (Carbon, Nitrogen, Hydrologic, Prosperous, Oxygen cycles) tropic level – Food chain, Food web	
Unit – 3	Concept of Biome, Ecotone and community – Concept of ecosystem, energy flow in ecosystem – Types of ecosystem: – Forest, Grassland, Desert and Marine – Ecological balance, conservation and management.	
Unit – 4	Elements of plant Geography: Distribution of forest and major communities – Distribution of major animal grouping in the world – Desertification – factors influencing world distribution of plants and animals.	
Unit – 5	Definition of Deforestation – Deforestation causes and consequences – Pollution types and their effects – Significance of biodiversity and controlling factors.	
Unit – 6	Application of Geo informatics in Species identifications and Tracking of animals in the forest (Drone, GNSS Survey, RADAR) – Application of Geoinformatics Indigenous species identified animals	

	in the Forest.		
Expecte	Expected Course Outcomes:		
1	Learn about the Concept and Component of Bio-geography		
2	Learn about the Darwin's theory and chemicals cycles.		
3	Understand the concepts of Eco systems.		
4	learn about the factors affecting world distribution of plants		
5	Understand about the deforestation and the pollution effects.		
UNIT	SPECIFIC OUTCOMES		
1	Development of Bio-geography, Plant and Animal Associations, Bio Types Soils		
2	Darwin Theory, Bio Chemical Cycles, Food Chain, Food Web		
3	Concept of Biome, Ecosystem, Conservation and Management		
4	Plant Geography, Major Forests, Animals, Dessertifications		
5	Deforestation, Causes, Consequences, Pollutions		
Text Bo	ok(s):		
1	Mathus H S, Essentials of Biogeography, Anuj printers, Jaipur.		
2	Peras N, Basic Biogeography, Longman, London		
Referen	ce Book(s):

#### ME - III / DISCIPLINE SPECIFIC ELECTIVE - IV (or) GEOGRAPHY OF HEALTH

SEMESTER-VI			
ME - III/ DISCIPLINE SPECIFIC ELECTIVE-IV			
	GEOGRAPHY OF HEALTH		
	TEACHING HOURS: 60 (5 Hours,	3 Credits)	
UNIT	LEARNING OBJECTIVES		
CO1	To understand the relationship between health an	d geograph	y and the driving
	force of health and environment.		
CO2	To recall the history of disease and elaborate on t	the agents o	f disease
CO3	To illustrate the components of the influencing en	nvironment	on health.
CO4	To differentiate the types of diseases like commu	ınicable and	non-
	communicable diseases.		
CO5	To elaborate on the health care planning and mar	nagement of	the World and
	India.		
CO6	Assessment Unit		
UNIT	DETAILS	NO. OF	COURSE
		HOURS	OBJECTIVES
	Geography of Health – Definition –		
_	perspectives and Bio-Medical Approach –	10	CO1
I	Psychological – Sociological – Economic –	12	CO1
	Geographic Approach - Driving Forces in Health and Environment.		
п	Concept of Diseases – History of Diseases – Agents of diseases – Control of Diseases,	12	CO2
11	Transmission Triad and mode.	12	CO2
	Health and Diseases – Control of Diseases in		
	Environmental context with special reference		
III	to India – types of Diseases and their regional	12	CO3
111	Pattern – Communicable and Non-	12	
	communicable diseases.		
	Environment and Health – Three components		
117	of the environment – Physical, Biological, and	12	CO4
IV	Social, Occupational Health, Mental health,	12	CO4
	Health Information, and Basic Medical		

	Statistics – Mapping of Diseases.		
	Health Care Planning and Management—		
	Health Organization – Hierarchy of Public		
	Health Care System in India, health		
V	planning in India— Health Policies and	12	CO5
	Schemes in India – International health -WHO,		
	UNICEF, UNDP.		
VI	Assessment Unit		
UNIT	LEARNING OUTCO	MES	
	Recalls the importance of health., Understands		-
I	Health and environment., <b>Define</b> health. <b>Disting</b>	uishDevel	opment and
	health. Realizepopulation dynamics with health		
	Understands the impact of Environmental Qua		
II	the impact of human activities and environment	-	· •
	reasons and influence level of climatic change a	ind human l	nealth.
	Learns the disease patterns, understand the co	entayt of dia	vaaga natta <del>un</del>
	with Indian setup. <b>Compare</b> the types of diseas		
III	of disease with regional concepts. <b>Differentiate</b>		
	non-communicable diseases. Summarize biologi		
	of diseases.	eur ugenus i	in the spread
TX7	Understands the relationship between the Environment	nment and l	Health and also
IV	assess the influence of the various components of		
	Categorises, the various healthcare planning. Examines the role of WHO		
	show in the healthcare planning. Understands-		
$\mathbf{v}$	India. Classifies the importance of voluntary he		
,	the need for the family and community healthcare planning. Understands		
	and list the various health schemes of India.		
VI	Assessment Unit		
UNIT	SPECIFIC OUTCOMES		
	Various Approaches of health – Bio medical	. psycholog	rical. Sociological.
I	Economic and Geographical Approach	, pojemere	sioni, societegioni,
II	Diseases – Concepts, Agents, Control of Disease	es	
III	Incidence of Diseases in India, Communica		on-Communicable
111	Diseases		
IV	Environment and Health, Components of the Er	nvironment	Medical Statistics,
1 V	Mapping of Diseases		
V	Planning, Management, Health care System In Ir	dia, World	Health Polices
